Part of
Public Record

Private Citizen

If the public benefits from a project then it should be allowed. In the case of the Great Lakes Basin Project the public does not benefit. This project will harm every rural community that depends on property taxes to finance their schools, fire departments and other public services. As a result this project will raise the taxes the public as a whole must pay. There is no positive financial affect for the public from this project and as such it must be denied.
