Please deny GLBT's application to build. As a Boy Scout I participated in several projects at the Nygren Wetlands and Colored Sands Forest Preserve. Both of these areas, along with other natural areas that are home to much wildlife, will be negatively impacted by the project. It is a shame that other young people may not have the opportunity to explore these areas simply for the potential to resolve rail congestion. Potential is a key here because the plan has not been fully evaluated and is not supported by the major rail companies. Please deny GLBT's application to build.
