I am in favor of NARPO's petition to limit the number of NITU extensions to six or a maximum of three years. I wish that there were no NITU extensions to these proposed rail trails. As a landowner I am speaking from a perspective of one of the people that are on the losing end of any legislation or decisions made in favor of these rail trails. I've been fighting for over 25 years to keep a trail from going through the middle of my property. I have enough trespassing issues without a trail inviting people to walk through my property. I would like for people to understand what these trails are doing to our property. This is the property I own. I pay property taxes and insurance on MY property. I the reason I own this property is to live away from town and neighbors. I've tried to explain this to the people in my town that want a trail through my property, but all they can see is what they want and not the issues of legally trespassing on my property. These trails are also the perfect location for person-on-person crimes to transpire. In the example of my property anyone using the trail would be in the middle of nowhere. If there is any problem at all rescue would need to go through my property to reach anyone that needs assistance. I could go on and on, but this is like a dead horse that has already been beaten. I'm so tired of having to fight against something that shouldn't be an issue to begin with. Please try to see this issue from the perspective of the landowners that are losing out if these trails become a reality. Thank you for your time and attention to this matter. I appreciate your understanding and consideration.
