I strongly encourage you to read all of the following information, and looking up the PDF from Scott and Amy Nystrom during the Boone County IL meetings. When the rail was drawn through Boone County, IL I intersected right in the driveway of our 110 acre farm. When we researched the rail and information provided by Frank Patton and his environmental attorney, Jay Johnson, what we found was UNBELIEVEABLE!!!! Lies and false information of the environmental impact of the railroad. Not only is there NO public need for this railroad, no other rail companies are interested in using this rail. Frank Patton, being the majority controller at 87% of the company, obviously has ideas of grandeur. He and I have talked personally, many times. He says he wants to leave a legacy for his family. I told him, do something more feasible like build a golf course. This is completely over the top. This would sure leave a legacy, ruining the lives of thousands of farmers, people, businesses, animal habitat. He would actually be responsible for removing food from the American families tables. If this was necessary, the large rail companies would have completed this years ago. Frank wanting a 200 foot easement and taking land from the public by eminent domain is illegal for a private company. Please read all of the information provided so you have a true understanding of how ridiculous this whole thing is. Boone County made it perfectly clear tat he is not welcome within 5 miles of the county. I bet you will not find a handful of people along this entire proposed rail that are not opposed to this idea.

Thank you,

Amy Nystrom
