Message:

Please do not allow this to become law on any level. As someone who has used and greatly appreciate rail to trails in several states. (Washington the most, since I lived there for over a decade) I understand the importance of turning unused rail lines into mutli-use non-motorized roads. One for traffic lanes to get to and from work, shopping, eating out, exercise, family time in a safe outside environment and so much more. Please do not limit the time and therefore handicapping us to continue the work of bringing our trail system up to needed standards.
