Public Record

Please DENY the Motion for Order of Protection requested by GLBT. We have every right to know who the investors are. Please deny the GLBT rail business application Please do not allow the GLB RR to be built anywhere in the United States. We had some spring rains in the area of the railroad route. One area had 3 plus inches...and as I drove by it 3 days after the rain there were huge ponds on both sides of the roads. The soil was good black dirt. If a railroad is built in that area the water could be going over the road for days because of the lack of proper drainage. There would be no timely way to move that much water without the present tiling system. It will be impossible to properly tile under the railroad route. Water will drain to the lowest areas and it will choose the way it goes....over roads, around and through fields and structures of any type. It is my opinion the GLB RR people will say they have a solution. I would suggest that the environmental people consult with an agriculture engineer.....who are concerned with the design and construction and improving of farming equipment. One can't believe what water can do when there is a 50 year flood. Thank you. Bob Carothers
