Please do not approve the GLB RR request to build a railroad anywhere in the United States. The investors are just that...investors who want to make money at the expense of citizens. There is no good reason this company should ask or demand that anyone give up their land, home, etc. so they can make money. This could set a dangerous precedent for future companies to request Eminent Domain. Would you want to give up your home for a private investment group so they could make money and then request federal railroad loans? Where does the money for the federal railroad loans originate? This project is NOT needed and does not serve the "public" interest. NO BUILD is the only acceptable decision. Thank you. Kenneth Carothers
