One aspect of public necessity includes whether or not the applicant lives within the area of a proposed project. In the case of the Great Lakes Basin project the applicant, Great Lakes Basin Transportation is not a company from any of the states it seeks to do business in. this corporation is a New Jersey entity and as such it has no right to claim public necessity for a project, as it is not part of the state it seeks to operate within. Please issue an immediate no build ruling for this project as GLBT does not have the right as a out of state company to seek approval to take land from residents living in a state where GLBT has no current infrastructure.
