Please deny the Motion for Protective Order. It's unconscionable that a private spec company thinking they're entitled to eminent domain would even consider hiding extremely important, key facts. In fact, it appears there are very few "facts" in GLBT's application, especially what the true hidden, short, and long term costs are to the environment, communities, and landowner. Please deny the motion and, more importantly, the GLBT application as a whole to preserve the constitutional rights of those unlucky landowners and communities now living with this terrible, looming imminent threat to their lives, investments, livelihoods, and legacies.
