I think you should deny the request for the glb to block us from knowing who the inveators are for the whole situation they have created with his denial how do we know its not Foreign Or if there is one at all and if it is by people who have filed bankrupsy before and they cant hold up what they say they will do if he is a man who has had a brain tumor is he dealing with a full deck these are only a few reasons you should not let them file for an order to block the knolage of who is behind all this...(I think its a Trump type of move to do this) (it is not something he should be able to do while he is presadent it feels like a hitler move) any way even if it isnt him if anyone else would have to diclose who they are and there finacial status they should also.

Thank you for your time
