Sirs,

We would like to add our voices in protest to the location of this railroad through our country side and farm land. These railroad tracks will cause many problems for this area.

One of our main concerns are with our basic safety. The many trains through the area can cause great delays in the ability of police, fire, or ambulances to reach us in a timely manner.

Another, big concern, is with the value of our property. I can't imagine many people want to buy or live in an area surrounded by speeding trains. We do not!

Our last concern, is for the destruction of our way of life in the country. We enjoy a quiet life, without the noise of speeding trains and loud horns. We care about the effect this will have on wildlife in the area and the Kankakee River and surrounding areas.

Don & Terry Hall
