Part of
Public Record

To whom it may concern:

Please advise why the myriad comments, resolutions, and declarations from groups, landowners, politicians, local governments, county governments, state Departments, etc. have not been formally responded to. The people threatened by this have done everything required of them in a peaceful and cooperative manner. We've been told to write letters, and we have (5,000 plus). We've been told to get politicians involved, and we have (see the many letters from Congress men and women, state reps, county board members). We've been told to inform the public and share our environmental concerns (to which I've seen some tremendously written letters by some very smart people - much smarter than I). What else is it that we need to do to prove this project is not a viable one?

I've spent hours upon hours amounting to DAYS of lost work spending time on this threat. It has effected my profession, my family life, and all of the relationships around me. I cannot continue sacrificing those things while this unjust threat of eminent domain for private profit continues being dangled over our heads.

I urge you to reference the scoping comments from the Illinois Department of Natural Resources. This should be all that is needed to determine the extent of the environmental impact. It is not exaggerated or filled with falsehoods, but states facts and actual impacts/concerns.

Please advise when that, and all other comments and environmental concerns will be responded to, as that is what we were told to do.

Thank you for your time and consideration.

Jason R. Kokos
