This is just another attempt to charge and inconvenience the people of this country. Any debt ,problems, issues that affect the people always becomes our problems. The political aspect is typical. You don't care about the hard working citizens or humans of this country. I'm am disgusted to be a citizen of this lost country. This is just more proof of your weak attempts to fix problems using others lives and resources. Other countries in the world have it figured out. This country could use use some serious lessons in respect and decency period. I'm thoroughly disgusted with everything you are doing.

Sincerely me
