Public Record

All infrastructure projects, especially one of this magnitude, live or die by their funding. Those that invest in this project financially are the lifeblood of the GLBT. They give the ability for Frank Patton and his team to take our farms and property against our will! We have a right to know who these people are! There is no clearly stated reason that has been given by GLBT to deny transparency of the project. Not when so many farms and privately owned properties are at stake.

Please DENY the motion of protective order for GLBT. We cannot hide, why should they?
