Public Record

Northern IL has the most fertile farm ground in the world. Building this "for profit" RR would destroy farms, disrupt water flow, crush drainage tile, and be an environmental disaster in the event of a derailment. Our local schools and emergency personnel are all against GLBT. Dealing with closing of rural roads and high speed trains running every 10-15 minutes would be a terrible hardship for them. This project has been very secretive from the start. I demand that the Motion For Protective Order be denied as well as their application to build. It is totally inconsistent with "public convenience and necessity" as Mr. Patton claims. A NO BUILD decision is the only common sense outcome. Thank your thoughtful consideration in this vital matter.
