I oppose GLBT being given a permit to build. There are too many unanswered questions about the financing of this project. The project cost is not clear and seems built of arbitrary numbers. This alone is very disturbing as are suspected profiteering motives.

I am also objecting for the reason that no one has seen a report confirming the need for a large scale rail project (are we in the 19th century?), a project that will almost certainly pollute and disrupt farmland, waterways, and more. It is delaying our own farms' future and our decision to stay in the area, yet selling our farm with this railroad project in limbo is making our ground hard to sell. The proposed rail crosses right in front of us. Our organic farm customers will not enjoy waiting for a freight of crude oil or other toxic waste to cross our road. Nor will we. Please reject this selfish, profiteering, bullshit project that is not in the greater interest of the people.
