Public Record

To Whom It May Concern,

I am asking that you deny the motion requested by GLBT for an order of protection to withhold finances from the public. They are a private company who wants to impact and possibly ruin many peoples' livelihood for their own financial gain and but do not want anyone to be able to access their financial information. It appears this company wants to be a private company when it comes to discussing their wealth but want to be treated as a public company when it comes to taking over other people's land!

Thank you for taking the time to read and consider by request.

Lori Peterson
