GLBT Application

Frederick Mark Scheppler

I oppose the GLBT proposal. I don't believe their proposal meets the criteria to warrant further consideration. They have chosen not to work with existing railroads, groups, or organizations charged with solving the problems they propose to eliminate. I believe this is a greedy land grab by an unproven outfit that will likely declare bankruptcy when their fantasy future projections prove unrealistic. The decreased land values and negative environmental impacts to the communities along the route are unacceptable. Please reject this request outright.
