Message:

As a Bartlett resident who lives off W Bartlett Rd west of the tracks (opposite side from most of Bartlett), the train crossings are an absolute menace. We are constantly stuck by stopped trains. Missed meetings, missed appointments, endless delays are a real impact on daily lives. More than a hassle, the constant train stoppages are truly a significant negative aspect of living in Bartlett right now.

Group/Affiliation: Lakewood Mills homes

Message: Please consider the impact the freight trains make on emergency responses, school attendance and work commute. The lengthy times we have to wait for the crossing to clear impacts our professional and personal lives so much. While it may not seem much to others, our quality of life is impacted greatly by these delays. Lives are in danger due to delayed emergency service responses.

Group/Affiliation:

Message: We have lived in Bartlett for 14 years. The train tracks have made us late to work, school, doctors appointments, etc. I have been stuck on the wrong side of the tracks trying to get home to my children. Delays of up to 30 minutes. Even when you try to go around a stopped train - it is across Spaulding as well. I have seen fire trucks with lights on stuck on the wrong side of an emergency because of a stopped train. It is a safety hazard for sure. I am absolutely in favor of moving the interchange out of Bartlett.

Email Address: * Bononikki1@gmail.com

Group/Affiliation: Westridge Subdivision

Message: For the past few years, we have been stuck at the West Bartlett Rd. crossing with either very long delays, or completed stopped or stalled trains.

What's annoying as heck is the train horns at various times in the middle of the night, when there is a sign clearly stating "No Horns". We live well over a half mile away, and it wakes us up multiple times. We can only imagine how the people who live in the trailer park must feel about the sound level.

Message: More than 50% of the time I'm on West Bartlett Road or Spaulding Road, I get stuck by the freight train. It always takes forever, and not only that, but it's dangerous. One time I was waiting for the train to pass by and I noticed there was an ambulance trying to get through. The train was completely stopped and the ambulance had no way of getting around. For the sake of the people of Bartlett and the surrounding areas, please do something about this.

Group/Affiliation:

Message: Please please please move the train interchange out of Bartlett. I can't tell you how much these constant trains effect our every day lives. I live west of the tracks off of West Bartlett road. I will run out at lunch time - and within an hour, I will catch a train on my way out of my house and again coming home. This is a normal occasion. Almost every time I'm leaving or coming my home, most of the time they are sitting on the track not moving! I will catch a train at all hours. It's been this way for so many years. It affects emergency vehicles as well. There is also no way around these trains since the surrounding streets also are affected, such as Stearns Road. Please do the right thing and move this out of Bartlett. It would make a world of difference to the home and business owners including emergency vehicles. Thank you so much!

Email Address: * jwojo2@gmail.com

Group/Affiliation:

Message: As it currently stands, using the Bartlett IL area as a rail yard doesn't work because the trains inevitably block West Bartlett Rd, for a considerable amount of time. And because of the way the roads are constructed in the area, there is not a viable way to go around the blockage. The area was never intended to be a rail yard and it is detrimental to the community. I encourage you to move the interchange to Indiana.

Group/Affiliation: Kim DeLaGarza

Message: I live on West Bartlett Road right next to the tracks. We bought our house before CN took over. It is nearly driving us to leave our house. I sit at stopped trains minimum 5 times a week building up to hours upon hours UPON hours of my life every month. I've wasted more time sitting at the train, been late to so many appointments, to school, to work, to funerals, to the hospital. The horns blow all night long, the noise, the dirt, it's disgusting and makes living in that area of Bartlett unbearable.

Group/Affiliation:

Message: I would like to provide my support for moving the CN/CP Interchange at Spaulding Road to a location outside of Bartlett. The trains crossing (and stopping) West Bartlett Road frequently cause delays and disruptions to our community located just west of the interchange. We are separated from our nearest fire station by this crossing and a large number of school children cross there to get to and from school daily. I was even stopped by the train on my way to the hospital for the birth of my daughter. Reducing the traffic at this crossing would help make our community a safer and happier place to live. It would make a huge impact. Thank you!

Group/Affiliation:

Message: The Bartlett interchange has become an increasing problem with long freight trains tying up traffic for up to a half hour. It is also a dangerous crossing impeding the direct route of fire, ambulance, and other emergency vehicles. An elevated track is not planned nor would it alleviate the immediate issue. The interchange needs to be moved to where it does not block access to the rest of Bartlett. Ideally, it should be built elevated to insure against access problems in the future. This needs to be moved right away before it costs lives! Thank you.

Group/Affiliation:

Message: The Spaulding Interchange is causing long delays, multiple times per day. I have seen emergency vehicles stopped, waiting for a standing train to report to an emergency on the other side of the tracks. Often there is not an alternative route because the larger trains can block more than 1 major crossing at a time. With the population increase in the past 14 years, the standing trains are creating more and more issues for local traffic, noise, and safety.

Group/Affiliation:

Message: Please move the interchange from the West Bartlett tracks to another location. As a resident right next to this track, I am constantly worried about the safety of my family and neighbors if something were to happen. We are consistently stopped for 10+ minutes or more at these tracks throughout the week. If there were an emergency and emergency vehicles were needed at our house, there is a high likelihood they would be stopped because of these tracks, delaying any assistance. It is unfair to our neighborhood and residents that we have to lack in public assistance because of a private train blocking their path.

Group/Affiliation:

Message: I'd like to take this opportunity to speak in favor of limiting the train stoppages and car/track changes at the West Bartlett Road intersection between Naperville Road and Rt. 25. The waits are beyond what was communicated to us when CN took over the tracks and traffic experiences unnecessary delays. I implore CN to find a location to stop/switch that does not block an intersection. The car switching during overnight hours causes unnecessary noise as well. I thank you in advance for ready my concerns. Best regards,
John Gura

Message: The number of times I have been stopped by this train on all three of the roads it blocks is beyond counting. While I understand transportation needs must be shared with all forms, the length of time traffic is stopped is ridiculous. I am a teacher and multiple times have been stopped so long in the morning that I have had to use sick time and get a sub for my morning class because I have been stopped for 15+ minutes. There has to be a better way for this train line to exist and for it to not clog up morning commuter traffic.

Message:

This message is in support of relocating the interchange outside of Bartlett and hopefully to a location where trains don't block intersections. I support trains and think they are crucial to our economy for the transportation of goods. Thanks for looking into an alternative to help us car drivers too.

Message: Please consider moving the Canadian National interchange away from Bartlett. Being a resident within a mile, the blockages on W. Bartlett Rd make living here unbearable. The wasted time, wasted gas, even the diesel smell of idling trains affects our quality of life. We have even witnessed firetrucks stuck on the wrong side of the tracks trying to get to a residence! Thank you.

Message: This is request for the interchange to be relocated out of Bartlett. The interchange has been causing major inconvenience for commuters that lives in the surrounding area. Personally has impacted my family when unexpected standing trains blocking roads; from cost of gas, wasted hours accumulated to causing tardiness for important events. We understand that trains have to pass through and we can be patiently waiting for 5 min. But, when it becomes 10-15, even experience 30 mins, it impacts us significantly in a negative way. We hope and pray that you hear our voice and the communities' impacted by this.

Docket #: - -

Subject: * Bartlett CN Railroad Switching Station
First Name: * Melissa
Middle Name: S
Last Name: * Owens
Address: * 1940 Woodhaven Dr

City: * Bartlett
State: * IL
Zip Code: * 60103-
Email Address: * Melissa.owens0727@gmail.com
Group/Affiliation: Self

Message: The current switching station delays traffic on West Bartlett Road in Bartlett IL, sometimes for up to 20 minutes at a time. As my neighborhood is on the west side of town, West Bartlett Road is our direct road into the village. Other routes require substantial detours, increasing automobile costs and pollution in the area. West Bartlett Road is already congested; constant delays severely impact transportation times.

Furthermore, the closest fire station to the far west side neighborhoods, encompassing at least 1000 homes, is on the opposite side of the tracks. Substantial and frequent delays put our homes at serious risk of slow response times by first responders.

Today, as with many other days, I was delayed by a slow moving train out of the switching area by 15 minutes. These frequent delays cause a significant disincentive to travel into the businesses within Bartlett, which affects all of the small businesses and the vitality of the downtown area.

Message: I live just down the road from the train track. It's a safety hazard when the trains are blocking the road and the fire trucks cannot cross the tracks! There sometimes is no other way to get home! The long delays block school kids and school busses! Many people use this road because it leads directly to 4 subdivisions on the west end of West Bartlett road! I have lived in my home for 25 years and the traffic only increases and train traffic and blocking the road is frequent. Please consider moving the switching station. Thank you.

Message: I am in favor of moving the Spaulding interchange to a location outside of Bartlett. There has been too much residential growth in this area to have freight and commuter trains go through this area as often as they do. I am also in favor of making this location a quiet zone. It makes no sense to me that this location is not a quiet zone but tracks crossing Naperville rd. just east of this location is a quiet zone. I would love to be educated on the reasoning for this.

Message: Hello, I am a resident of Bartlett near the Gifford/Spaulding interchange. I wanted to share how horrible my daily commute is because of the frequent delays and stops that the CNA train has caused.

An experience I wanted to share is when I was taking my son to the emergency room when he split his chin open. I was stuck at the train. Thank heavens this wasn't life threatening.

Another example is the frequent turned cars when the train is stopped. We go from one crossing to another...racing to avoid getting stuck at the other tracks. Thus just isn't safe.

Please consider for our children and future of Bartlett to move CNA out of our town.

Thank you.

Message: As a resident of Bartlett and business owner of property at the Bartlett-Elgin border since the early 90's, I have been burdened personally and professionally by these trains for many years. They are not conducive to business, economics or transportation in the area. I get stuck at them taking my kids to school, going to work, my employees and trucks are not as productive, due to the delays they pose, they are a major strain in our area. More often than not they are at a stand still on the tracks and not even moving. At the very least they should be scheduled overnight, it's ridiculous to have this occur during peak travel times throughout the day. There must be some solution other than the current situation.

Message: The way our school district has the school boundaries drawn, this crossing on Stearns Rd in Bartlett makes both teachers and hundreds of students and their families late or delayed up to several times a week. I am delayed on average 2x a week. Issues with this crossing have made me over an hour late to work because of the blocked crossing and no good alternate detour.

Message:

I support moving the interchange out of Bartlett. The CN freight train stopping at west Bartlett road has prevented me from picking my daughter up from school on time. It has made my husband late for work o.n several occasions and I have witnesses emergency vehicles stopped at the tracks unable to get through. I have personally been stuck at the tracks for over a half an hour one time and know it has stopped on the tracks for much longer on numerous occasions. There is not an efficient alternate route to get to home so the interchange remaining in Bartlett is a huge inconvenience for me and hundreds of other homeowners.

Message: Please move interchange outside of Bartlett. My life is effected in following way:
Of the seven days in the week at least 3 days I get stuck at the railroad on west Bartlett rd due to train standing and not moving from 10 minutes to 40 minutes. This makes me late either for work or being home at reasonable time for my family. I really can't express how frustrating it is. I have to send my boss pictures of me being stuck because he doesn't believe that train my cause delay that often. Running errands, grocery shopping etc is a struggle only because we get stuck there on the way out and back. We even considered moving because of train situation. Thank you.

Message: Please move the interchange. I lived in Bartlett for many years near the corner of West Bartlett and Gifford Rd. I have been stuck by trains countless times. Still now on my commute thru Elgin, I get stuck by the trains. It's also very concerning that Bartlett invested in building a fire station to service the West side of Bartlett, but residents can't get the services they pay taxes for because of the ignorance of CN/CP. I would hope, in good conscious, that you expedite the move since you have made the citizens of Bartlett and surrounding communities wait long enough.

Group/Affiliation: Bartlett Residents

Message: To whom it may concern. I am greatly relieved to hear that there is a proposal to move the train interchanges away from Spaulding in Bartlett. The traffic it creates multiple times per day has created such havoc on W Bartlett Rd, Spaulding Rd, and Stearns Rd. I am a resident of the subdivision just West of the tracks and the often stopped trains are a barrier to a fire station that is less than a mile from me. For the safety of my family this has been a massive concern. For our day-to-day lives it makes us and countless other Bartlett residents late for work, late for events, miss the Metra commuter train, dangerous for the many bicyclists who often use this road once the massive amount of traffic is let out all at once after the gates finally go back up. It is hazardous in many ways. I would ask that you please approve the proposal to move the interchange as this is a heavily populated residential area and it is simply a matter of time before something tragic will occur as a direct or indirect result of the traffic that is being manually created, or inability of our Emergency Services to get to a resident in grave need. Thank you for your consideration. Brian Clary

Message: The train delays at West Bartlett RR crossing have been a continuing problem being that Bartlett has changed its boundaries for the schools and some high schoolers are to report to South Elgin High School. Constantly there are train delays, problems with the crossing gates and trains stopped on the tracks while RR workers are getting paid and we sit and are docked at work, written up, let go, and the students have been marked tardy and have had in the past to wait in line at school to sign in late, while this particular day was testing, so they missed time allotted. Thought there was a ruling as to how many cars and how much time a train could hold up traffic. Maybe Canada should build an overpass.

Email Address: * cmwalsh07@gmail.com

Group/Affiliation:

Message: Bartlett drivers are seeing increasing traffic delays on West Bartlett, Stearns & Spaulding Roads due in large part to Canadian National (CN) Railway's interchange with Canadian Pacific (CP) at Spaulding Road. The proposal to move the Spaulding interchange to a location outside of Bartlett would help alleviate standing trains in this area. The standing trains cause residents living in the area to be late for work, for school, late getting home and other destinations. Often having to travel miles out of their way to reroute around the tracks. Please approve the move to a different route that, hopefully won't cause these same issues to happen to another community. Thank you.

Message: Please favor CN to discontinue use of the Spaulding interchange. As a local resident, I have missed metra trains to work, missed critical work meetings, have seen school buses stuck at stopped trains, have seen first response vehicles with lights on stopped at stopped trains more times than I can count. The area west of tracks has many houses with new ones going up and a K-6 elementary school. Our closest fire department is to the east of the train tracks and the city police department is also east of the tracks. These trains just don't move along like most train crossings, the trains here's actually stop for 20 minutes at a time to do the track and train changes done at interchanges. Our area has had at least 3 house fires within the past few months, it poses a risk for as the local fire department would be prevented from timely responding. Please let CN move their interchange so that Bartlett residents can be free of the inconvenience and safety hazard for good.

Message:

To the STB, I am a resident of Hoffman Estates, IL, and we are currently opposing the CN/Wisc Central second track siding expansion in Hoffman Estates/Elgin/Streamwood. I spoke with Katherin Bourdon, Attorney Advisor, at STB on 4/22/19 regarding our opposition. She also stated the Village of Barrington filed proceedings on 4/9/2019 against CN/Grand Trunk Corp. CN/Wisc Central is not a good corporate neighbor as they park their trains idling next to our homes for 6, 8 10+ hours. CN hosted a public meeting on 5/30/19 with 150 residents opposing the Hoffman/Elgin/Streamwood expansion. They did not mention the Spaulding Road interchange move--they stated they were working with CP regarding right of way--not interchange "movement." With this additional planned Spaulding Road interchange move, we must request it does not negatively impact the citizens and communities to the north (Hoffman Estates, Elgin, Streamwood). There must be less populated, fewer residential areas CN/Wisc Central could choose to improve the quality of life for citizens and tax payers in this area (Cook and DuPage Counties of Illinois). CN is not truthful with us about their full plans for this area. We ask for your support with CN transparency with these planned changes. Thank you.

Message:

My family and I have been a resident in Bartlett for 14 years. As much as I love my community, the increased train traffic and constant stalled trains have made leaving your home a nightmare. You feel lucky if you don't catch a train. Traffic has been backed up so far down west Bartlett road you can't even get out of our subdivision. There are times I've left to run to the grocery store and caught a train, then on the way home caught another train 30 min later. This has now caused us to shop in south Elgin so Bartlett is losing revenue. We have cars constantly turning around to reroute, speeding through the gates in fear of another train coming and worse thing our fire department is located on the other side of the tracks. I unfortunately did have to call 911 recently and the fire truck was stuck at the train. Luckily everything was ok but if it was more serious I'm scared to think what could of happened. CN with CP moving their interchange out of Bartlett would be the best thing for our community.

Message: Please move the Canadian RR train. We live one mile from the tracks. We have lived in our home for 12 years. The trains have increased over the years and frequently have gotten stuck on the which have caused me and my family to: be late for work, be late for doctor appointments, and have had potty accidents for our child due to long delays with the train. Also, we are NOT able to leave the windows open at night due to the trains coming through around 2am-3am. We also had to get thicker windows so the noise of the train at night didnt wake us up in the middle of the night. Communities 1-2 miles of the tracks should legally be able to vote to approve or decline increased train schedules.

Message:

One of the latest train-related post on Westridge subdivision's Facebook group came in and reads, "Train has been stopped for at least 25 minutes! Just started moving now!" The sad face emoticon that accompanies this post, one of hundreds of train-related posts that populate the page over the years, doesn't capture the constant frustration commuters feel every day as they are blocked trying to get through the West Bartlett Road railroad crossing.

But the delays at that crossing, caused in part by the CN switching station located just west of West Bartlett Road near Spaulding Road, go beyond simple inconveniences and frustrated social media posts. The delays are a public hazard and the CN Railroad organization has Bartlett, and the surrounding communities, held hostage because the challenges caused by these trains are managed at a federal, rather than a local level.

The stalled trains waiting for switching maintenance at the Spaulding station not only block dozens of vehicles at a time at West Bartlett Road, but they can also block the crossing at Stearns as well. This happens on a regular basis, at all times of the day and night, with trains at a stand-still for periods that could last minutes up to over an hour. There is never any way to tell how long one of the stoppages will occur. During prime commute times, residents are late to appointments, kids are being delayed getting to schools and emergency vehicles can be seen turning around in search of other routes. And there is seemingly no recourse to address the issue as local municipalities cannot fine the railroad any longer for excess delays nor get the funding needed to develop over/under pass options at these crossings.

There has already been one derailment in 2011 at Spaulding that involved a train container transporting hazardous materials. Fortunately, all the chemicals were contained and no one was injured. But a simple Internet search shows how other communities haven't been so lucky as CN derailments have caused catastrophic events in other parts of the the US and Canada.

So, given what we know, hearing that the CN is looking to relocate this switching station to another party of the country from this area sounds like a huge win. If there is nothing that can be done locally to address this burden, then the complete removal of the station by the CN company is the best situation that this community could ask for. Sure, issues at the West Bartlett Road crossing remain...train traffic has increased since the CN took over and West Bartlett Road needs to be four lanes at that crossing to keep car traffic flowing efficiently and sidewalks are needed so residents can bike into town. But hopefully the tracks will no longer be blocked for unknown stretches of time, trains will continue moving quickly and the risk for additional derailments will be minimized.

Regards,
Bob Skwarek

Message: The number and frequency of standing trains, especially during high traffic times is more than just an inconvenience, it is a matter of public safety. With the lack of options to go under or over train tracks in the area and the volume of traffic held up by these crossings, something needs to be done immediately to avoid a tragedy.

Message: I am very concerned about the amount of time the road is blocked due to long or stopped trains. With small kids who are very active, we are constantly crossing the tracks to get to and from extracurricular activities. We have to leave 15+ minutes early every day just to ensure we have time to go around if need be. It take a lot of extra time out of our day which becomes wasted time. Unfortunately I have had to call an ambulance twice and I fear for an emergency when minutes matter. This is not just a nuisance, it's a safety concern.

Message: I live in the neighborhood just West of the interchange on West Bartlett Road. Since we have to cross that interchange to go most places, we are constantly getting stopped by the train. The big issue is that you don't know if the train will be stopped on the tracks for a very short amount of time or for 15 or more minutes. And unfortunately there aren't any quick way to get around the stopped train.

Additionally, the fire station for our area is directly on the other side of the tracks. So if there is a stopped train there, this area needs to wait for emergency services from a station 10 minutes away.

Message: This train is ridiculous!!! On an average I am stopped there for at least 8-10 minutes. With the highest time being 22 minutes. It is very concerning since our first station is just on the other side of the trans. Our closest emergency services do not have access to our subdivision, this does not seem safe at all. This train has also caused a back up at least .5-1 miles. It is usually switching when most drivers are heading for work in the morning causing many to turn around and be detoured for work. This train is the only reason I do not like where I live!!!

Message:

My subdivision is just west of the intersection of the former EJE tracks and West Bartlett Road. When we built our home in 2005, the freight tracks were used very little, but all of that changed when the STB approved CN's purchase of the tracks. Since then, I get stopped by freight trains blocking West Bartlett Road on 1 out of every 4 or 5 trips. This has had a massive impact on the quality of life for neighbors in our subdivision. What makes the impact to our area especially high is the proximity of alternate routes - the grade separation on Lake Street is a mile to the north and requires a 10 minute reroute to get to. There is no grade separation anywhere nearby to the south. In addition to the inconvenience and unpredictability of getting stopped, the grade crossing on West Bartlett Road is a huge safety issue as emergency vehicles have to take a long reroute or be pulled in from neighboring towns to get to any of the neighborhoods west of the freight tracks when trains are blocking the road. With the switching station just north of the West Bartlett Road grade crossing, freight trains frequently block traffic for 10+ minutes while the trains complete their operations. If these switching operations could be moved to an area with less impact on residents and vehicle traffic, it would represent a significant improvement in quality of life for those of us in Bartlett who have been suffering with unmanageable freight traffic for nearly 10 years. I urge the STB to grant CN's request to move its switching operations away from the Spaulding Road station in Bartlett, IL.

Message: I am for moving the interchange away from Bartlett. Where it is located now causes numerous issues invoking travel and safety in our community. Our fire stations, police and hospitals are on the other side of these tracks, potentially causing issues while the gates are down for 30+ minutes at a time. Train horns blare through the night and can be heard half of a mile away with windows closed, I can't imagine being right next to the tracks. School Busses are constantly delayed due to the trains being stopped on the tracks, and they're constantly breaking and staying down for HOURS. Please move this interchange somewhere where it won't affect so many people's lives!

Message: I am writing in support of moving the CN Spaulding Road interchange. Over the past few years since the CN / CP merger, CN regularly blocks grade level crossings at Spaulding and West Bartlett Road, often times for longer than the allowable time and during rush hour. Calls to the CN number on the sign at grade crossing often result in no action to move trains when they've been there too long. I don't mind freight trains moving through the area on their normal routes but the grade level crossings are a huge inconvenience for area residents. Grade crossing at West Barlett Road was blocked this morning (6/3) during rush hour causing huge delays and me to miss my commuter train to work.

Message: Please, please, please move this interchange out of Bartlett!! There are thousands of families affected by this! Our family has been affected by this for the past roughly ten years by being late to work, appointments and many other events as the train will be immobile for hours sometimes. My biggest concern is emergency situations where this train has delayed getting help in a timely manner!!!! Also, there have been numerous accidents getting out of our subdivision. There is no traffic light, therefore, when the train finally lets up, traffic is so backed up making it nearly impossible to get out of our subdivision for almost 10 minutes.

Message:

In favor of moving the interchange out of Bartlett
Our family owns the Spring Lakes Mobile Home community adjacent to the CN tracks. The standing trains and extremely long wait times have impacted our residents. Some of these residents homes back up to the tracks and the standing trains and switching station create continuous noise and odor. Trains clanging all hours of the night and day is quite a disturbance to our community. Not only the noise and standing train odor but the long wait times when trains are passing over west Bartlett rd blocking our intersection of cars with extremely long wait times. This also impacts the safety of people with needing emergency vehicles needing to get through. I would most definitely be in favor of this Interchange being moved from Bartlett

Message: Read about moving interchange with Canadian Pacific (CP) at Spaulding Road to a location outside of Bartlett. I would like to see it do the the traffic back up. I sat in one and saw a fire truck that could not get through and a school bus with kids to. I can not remember how long we waited but one thing for sure those school kids were going to be late for class. Also I hope this changes where they let their locomotives run all day and night until they need them during the cold weather months which is right by Spring lake estate mobile home park. We have been fighting to have them moved some where else away from our homes due the exhaust fumes they give off which stinks up our park and gets into our homes to. It is not the ones that pass through that are the problem, it is the ones which sit for a long time waiting for the switch and the ones sitting for days idling by our homes in the park with the exhaust fumes. If they can move it somewhere else I am for it do to problems with traffic backups plus to it is hard to get out of side streets along Bartlett Rd and Spaulding Roads. I like to see this problem solved so the town of Bartlett can grow. Lets all work on this problem together and get this done. I am in and will wait for your reply to see how it is going. Thank you.

Message: Hi I am concerned about my safety and the communities safety. I am a resident of Bartlett and an active community member. We voice our opinions on an online forum and I have a huge number of residents that are very disturbed by The railroad. Especially the crossing on Bartlett road in between Gifford and Munger. I have a heart condition and I had to take an ambulance to hospital there was a train that blocked the route I could have died. Second, my car got a flat on those tracks and my 1 year old infant was in the car we both could have been severely injured but I was able to pull to the side. There is a school nearby and school busses that cross those tracks and when the train blocks those tracks parents are concerned for their children's safety when they are not home in time because of the trains. Lately it's been really frustrating and affecting the residents quality of life. Canadian National wants to move the rail yard from Bartlett to Indiana ! This is huge for our community !! This means less train traffic, trains getting stuck on tracks, less blockages !!!

Sandy Dell'Aquila DiGregorio ▴ What's
Happening in Bartlett IL ?

33 mins · 

And this is another MAJOR reason why we have to do something about the trains....Fire truck was ready to cross the tracks as the gates went down. I pray for those on the other side waiting for the 1st responders to arrive

Bets... ▶ **Westridge of Bart...** · Oct 15, 2017 

I see the train stuck again. What time did that start today?

Lesmie Barb... ▶ **Westridge o...** · Nov 2, 2016 

CN strikes again. The train was stopped on the tracks at least 20 minutes today at 6:45 am. It messes up all the busses so my son was late to school.

Does anyone ever call the number to CN on the sign right by the tracks? I keep forgettin...

Lynette... ▶ **Westridge of...** · Nov 26, 2017 

Train is on its way to cross the tracks, South to north.

Even Emergency vehicles are stopped by the train.
This is getting out of hand.

That has always been my fear in a real

I hate this train 🤬 and now even the fire truck and ambulance is stuck. I hope they are able to reach the family in need on time. There has to be another solution!

Message:

CN/CP have been so frustrating for our community! It affects our daily lives with the number of trains and train blockages. Children are late to school, paramedics are blocked, professionals are late to work, and the list just goes on and on. It makes no sense for an interchange to be in a residential area like Bartlett! It is an annoyance to everyone and creates so many problems. We want the trains out of our town.

Message: Hello! I am writing in hopes to stop some of the trains horn blowing. I believe it's the metra but throughout the night and starting 5:00-6:00am the train runs through what seems to be every 5-30 minutes blowing its horn at least 5 times. I know the metro can't be stopped running through but is there any way to stop the amount of time the blow the horn? I have kids that wake up everyday to the horns along with myself. Thank you

Message: I am writing in support to move the interchange outside of Bartlett. When trains are stopped at the interchange it blocks a major artery for vehicles to reach a major road on the east side of the tracks. There are no short detours around the tracks when they get blocked which holds up traffic for vehicles trying to travel to the east side of the tracks. Again, the road (West Bartlett Rd) is a small but very vital pathway for travelers that need to go east in the morning. The same goes for West as there is a highschool that becomes inaccessible for students in the morning when trains have blocked the road. Another concern is for the neighborhoods West of the tracks, the closest fire station sits just east of the tracks. If there is an emergency, fire trucks and ambulances are not able to easily access three major subdivisions that sit just west of the tracks which can delay the emergency support needed. Sometimes the trains are stalled for upwards of 15-20 minutes that really impact commute times and traveler convenience. Please strongly consider moving the interchange.

Message: I am strongly requesting that the Surface Transportation Board move the CN/CP Interchange to a location outside of Bartlett, IL. The Spaulding location is not suited for this as it is nearly 100% residential. The trains stopped during all hours of the night make it difficult to some living close to sleep as the trains are running all night long while the crew is sleeping in a hotel. Also, several years ago there was a derailment at this location that was potentially very dangerous to those living nearby. The current situation also causes numerous delays for traffic when the trains stop for extended periods of time blocking intersections and effectively cutting Bartlett in half. This includes first responders not being able to get from one side to another to assist residents or each other in cases of an emergency. The Bensenville yard is a much better suited location for this kind of train movement. Thank you.

Message: Moving the interchange from Spaulding to Kirk yard makes sense from a logistics perspective. There are a higher number of tracks at the Kirk Yard compared to the Spaulding Interchange.

Each night, as I put my toddler to bed, we're constantly hearing the trains and it gets difficult for him to fall asleep. The spaulding interchange is surrounded by more residential than the Kirk yard.

Group/Affiliation:

Message: I would like to speak in favor of moving the CN/CP interchange at Spaulding out of Bartlett, IL.

I live directly adjacent to the CN track at the intersection of Ruzich Drive and West Bartlett Road.

When we moved to this house in 2005 the tracks were almost quaint. A few times a week there would be an EJ&E train that would slowly pass behind our house. Not long after that it was announced that the line would be sold to CN and the traffic would increase to perhaps 20 trains per day, with some moving at high speeds. We fought against this, but the sale proceeded anyway.

Since CN has taken over things have become worse each year. There are trains all day and all night, sometime several trains per hour. They come during rush hour. They come when you are trying to sleep. They come at high speeds. They come at low speeds. They stall and stop and block three intersections spread over 1.5 miles - Spaulding on the North to Stearns on the South. Sometimes they "park" behind our house with their engine idling all night long causing a rumbling or vibrating noise to keep us up all night. Since the Illinois Supreme Court ruled in 2008 (Eagle Marine Industries, Inc. v. Union Pacific Railroad) that tickets could not be issued for trains that blocked intersections for longer than 10 minutes, CN has been entirely unchecked in their treatment of residents along their trackage in Illinois.

Two times in the last month it has taken me an hour to get home despite being just a few hundred feet from my house. One happened at 4 in the morning. The other during afternoon rush hour as a long train blocked all access to my house either by blocking the crossing from the east or causing massive lines of traffic from the west that prevented me from "going around" the train and coming to my house from a different direction.

It is time to move the CN/CP interchange at Spaulding out of Bartlett and to a more rural area where there will be less impact on less people.

BTW - as I have typed this submission there have been two trains blocking the intersection behind my house. I've attached a photo of the view from my office of the one that is happening right now.

Message: I live in the Spring Lakes Estates Mobile Home Park, where the entrance/exit to the Park is on to West Bartlett Road just east of the tracks. I get stopped by the train several times a week, go to and coming home from work and on the weekends . It's one thing to get stopped by a train, but when it is stopped for 15 or more minutes at a time, then it reverses and the entire train goes back in the direction that it came...well it is EXTREMELY FRUSTRATING! When going to work, the traffic becomes so backed up on Naperville Rd with all the cars trying to get to Rt.20 to go west. Coming home and getting stuck sitting on the west side of the tracks...well there's just no other option than to sit and wait because the traffic is so backed up east of the tracks, there's no way to get into the Park where I live! And what happens is someone needs the Police and/or Fire Department in one of the subdivisions that are just west of the tracks when the train is standing still?! The Fire House is just east of the tracks. SECONDS CAN SAVE LIVES and these trains are STANDING STILL for A LONG TIME!!!! Not to mention the added POLLUTION to our air when they're sitting idling their engines. This must STOP!
Sincerely,
Susan Sliwoski
