I am the spouse of a Farmer that owns and farms ground along the proposed route. This railroad would put our family farm in a financial hardship because we bought this land so we could make a living from the land for years to come. It is a long term investment for us and we don't wish to see unknown investors make a large profit while we get fair market value for land we don't wish to sell. The little guy is getting taken advantage of by the big guys once again. Private land should not be taken with the help of the government for the profit of private unknown investors. It is un American. Thank You, Kathy Isham.
