We want you to know & hear our voice. We do not want GLBT proposal to be approved. This is a privately owned for profit group trying to take over already privately owned land. That is wrong. The GLBT is for their own monetary benefit, obviously not for the good of our communities. The offer of "fair market value" of land take over never considers what this will do to future land values for these individuals. The proposal of future toll highway and airport means more take over of private citizens land. The hardships to these farmers, families, & homes cannot be measured, as well as the environmental impact. The "belt" around Chicago should not be expanded. Don't push it on our communities. If Chicago wants it keep it in Chicago. The GLBT Group has not shown by law they are consistent with public convenience and necessity. There are too many that fear and distrust this greedy business group. This proposal is so very wrong. Please deny this proposal.

John and Elizabeth Carbaugh.
