Please do not grant eminent domain or any other process that will allow GLB RR to build a railroad. It is not needed, and no other railroad has come forth to say they want or will use this. This railroad will destroy many things in our environment. I walked out the door this morning to think about what I should write. Please see the attached photo. This wonderful oak tree will suffer. It will not do well with the sounds, vibrations, and fumes of a railroad. We contacted the Morton Arboretum a few years ago about the tree. They sent out a horticulturist who assessed the tree for us. He said the tree was a pre settlement tree being planted 350-400 years ago. Think of all the trees along the proposed route in the communities in Wisconsin, Illinois, and Indiana that will also suffer. Please think about our environment in our communities when you make your decision on the GLB request. Again please do not approve any of the requests of the GLB. Thank you for your time.
