Private Citizen

When you apply for a drivers license, a home loan, or anything you have to provide your name which is the same standards that the Great Lakes Basin investors should be held to. I am asking that their request to be kept private be denied. I am also asking that any rates or proposed rates also be made public.

I am also asking that this project now be denied, they have failed to show a need and the fact their own investors are too embarrassed to let their names be released further shows a lack of seriousness on their part.
