Part of
Public Record

I am writing to urge you not to adopt a proposed rule to limit the negotiating period for consigning a railbed to use as a trail. As an avid biker,runner, and cross country skier I can personally testify that Wisconsin's rail trails are not only a huge attraction in themselves, they have led me to visit and get to know and enjoy other parts of the state where I would not otherwise have gone. The many signs that pop up along trails advertising food and drink show that I am not the only one enjoying these options. Please don't choke off this wonderful public resource.
