you support the one year extensions up to a maximum of three years. Also state specifically that you do not support the "good cause" language, I am opposed to extensions to contract for Trial use, for any reason. If they cannot get that completed in one year, then they need to turn the property over to the landowners for use. This entire process is severely flawed.

See AB-853 (SUB-NO. 1X). This process of extending NITU's to allow Trail operators to extort landowners is a terrible practice. Get the agreement completed or walk away!
