When I last bought a tractor I needed a loan. The bank asked for an estimate from the dealership. Why can the GLBT project be submitted without any verifiable estimates of costs. They have no bids/quotes from any construction firms. This information must be provided, without it the entire project is questionable. Especially given the outlandish claims made by the company's founder, such as my bridges will be tourist attractions. Please demand GLBT submit written bids from reputable currently in business contractors for the construction of each bridge, overpass and mile of track they are proposing, until this information is submitted the project costs are unverifiable. A unverifiable project is not in the public interest or necessity as to meet public necessity one must be able to prove ability to pay for the project, and GLBT can not do this at this time.
