I am greatly concerned about the possible railbanking restriction being considered by the STB to only six - 180 day extensions. Many times negotiations that involve a railroad with possible railbanking take much more time due to a variety of issues such as funding, timetables, etc. I would like to strongly encourage the STB NOT to put any type of time limit on railbanking. We need more rail trails in the country and not to in anyway restrict there development. Thank you.
