After reading what RTC proposes with one year extension as usual RTC says nothing about the property owners rights along the abandoned ROW How many lawsuits have to be filed to protect property owners 5th amendment rights. How many tax dollars have to be wasted, some of these ROW have been abandoned for many many years and then to have RTC come along and not even care about the property owners I believe we have rights to and the STB should acknowledge that as well how long do we have to sit in limbo not knowing what will happen with what is really our property. Our privacy can only be invaded for so long before bad things happen as they have over the years. I am not the only property owner that has had issues with RTC and for the most part have been bullied by them instead of them just trying to work with us property owners. Enough is enough STB Please think about how this affects us property owners also. Thank you
