Winnebago Animal Cliinic

I am writing as a business owner in Winnebago, Illinois. I am opposed to the GLB rail line as this terrible plan would cut my business area in half. No less than half of my current clients come from the west side of Rockford and commute to my business. With the proposed plan for this rail line roads and access to my clinic would be greatly impacted. Road closings and track crossings would prevent easy access to my practice and greatly impact my ability to stay open and continue to employ the 20 people I currently have on staff. This is an eminent domain situation for private gain.....at the expense of my business and many other stores and homes in the Winnebago community! The costs of this project to farm land, homes, and business greatly outweigh the potential benefits for a private group of investors. Please shut this project down for the sake of the people in Wisconsin, Illinois and Indiana!
