Mr. McFarland:

I received your letter today forwarding the SHPO's conclusions and containing your request that the 106 condition be removed in this abandonment case. I'll begin preparing the Supplemental Final Environmental Assessment that recommends removal of the 106 condition. However, I would like to receive a copy of the additional information submitted to the SHPO on July 26, 2012 (i.e., the material prepared by Dr. Don L. Hofsommer). Based on the SHPO's response to this information, it provides the basis for a "no historic properties effected" finding. Therefore, it is important that this information be placed in the Board's administrative record for this case.

Please let know if you have any questions.

Thanks,

Dave Navecky
