Attachments: 2019-04-16_UBRY_STB_ROUTE_INDIAN_CANYON.kmz; 2019-04-23_UBRY_STB_ROUTE_CRAIG.kmz; 2019-04-23_UBRY_STB_ROUTE_WELLS_DRAW.kmz; Uinta_Basin_Railway_Craig_Route_(shapefile).zzz; Uinta_Basin_Railway_Indian_Canyon_Route_(shapefile).zzz; Uinta_Basin_Railway_Wells_Draw_Route_(shapefile).zzz

Dana,

We do not have a file sharing platform set up for the project yet, though we may be able to do this as we get further along into our NEPA process. I have attached the shapefiles as zip files with the .zzz extension in case that works. I have also attached each map as a .kmz file separately. Please let me know if you are able to open and work with these versions.

Best,
 Josh

Thank you for sending the information but, our computer system allowed only 2 of the 5 attachments through:

[Uinta Basin Railway Craig Route \(shapefile\).zip of type has been blocked.](#) &
[Uinta Basin Railway Wells Draw Route \(shapefile\).zip of type has been blocked.](#)

The content Uinta_Basin_Railway_Indian_Canyon_Route_(shapefile).zip of type has been blocked.

Do you have a filesharing site or possibly you could please resend them to me in individual emails and change the .zip ending to .zzz. Usually that works. Thank you.

Dana,

This is to follow up on your voicemail and email of earlier this week. I have received updated maps of the proposed alternatives in the Uinta Basin Railway project from the applicant (see attached). The applicant wanted me to understand that these maps show the centerline of study areas that they identified and that the final alignments may require minor changes as they learn more about what engineering would be feasible in the project area. I have also attached an information paper that the applicant provided describing the project and another report describing the process by which they arrived at the three proposed alternatives.

Please reach out if you have any questions about these files or need more information about the project. I look forward to working with you as we begin our environmental review process.

Best,
Josh

In follow up to my phone message, can we (EPA Region 8) get an electronic version of the maps attached to the preliminary comments letter. We would also appreciate information describing the alternatives and preliminary wetlands/waters of the US information.
