Subject STB Docket No. AB 167 (Sub-No 1185X)

Hi Najah,

As a follow-up to John's email to you, I should note that we sent a letter to ACHP with a notification of the adverse effect determination in this case on August, 10, 2006 (see attached). We received no formal response from Katry Harris, who was working as our ACHP contact at the time, nor anyone else. Katry continued to stay interested in the case, but never provided an indication that ACHP would participate. If we don't hear from you this time, we will assume that ACHP does not intend to participate on a formal basis (there was some indication before, that the ACHP might participate). I don't think that ACHP participation is needed at this time, however. We are currently drafting an MOA and are close to an agreement on resolution of effects.

Thanks.

Cathy
