Lou -

HDR has identified some new information that would assist in preparation of the Supplemental EA. I would appreciate it if you could inquire with CSXT and/or L&I regarding the availability of this information. The list includes:

- Track charts of the L&I line and/or CADD or Micro station files of the existing L&I alignment, two proposed siding extensions locations, Flatrock River Bridge location, and mileposts. This will allow for a more accurate identification of the study area.
- Any preliminary designs of the Flatrock River Bridge replacement and two proposed siding extensions.
- Any maps or shape files of CSXT's Belt Line between L&I MP 4.0 and CSXT's Indianapolis Line Subdivision, and CSXT trackage connecting the L&I line to CSXT's main lines in Louisville, KY.

Please let me know if you have any questions.

Thanks,

Dave
