Dear THPOs,

As you know, Richard Starzak and I joined some of you on a call Monday, July 21st (see call invitation below). The call addressed the sharing of cultural resources data with some landowners on property where pedestrian surveys were performed. This sharing of Information only applies to landowners governed by an agreement document developed by Carrie Laseur, an attorney representing landowners located mostly along the Colstrip Alternative. Archaeologists and historians from ICF, as well as tribal members participating in the surveys, signed the agreement document allowing the prompt sharing of survey data with these landowners. Soon, we will providing site data regarding historic and archaeological sites to landowners where such properties were found. We have begun assembling maps and spread sheets to provide to the respective landowners and will eventually be giving them the sites forms with official site numbers provided by the Montana SHPO. However, we felt it important to check with you regarding the degree to which we share tribal site information with the landowners.

Many of the tribal participants on the call felt that minimal information should be shared for tribal sites. The general consensus of the group was that landowners should be given a GPS point indicating the location of a tribal site that was identified on their property, but nothing else. As with the archaeological and historic sites, we would not furnish this data point to all landowners. Only those landowners represented by attorney Laseur who had specific tribal sites identified on their property would be given a GPS point indicating the general location of tribal sites on their land.

Some tribal members on the call believed that landowners should be made fully aware of the nature and location of all sites on their properties. Opinions expressed on the call included the belief that landowners' awareness of cultural resources on their property, particularly tribal sites, would bring about an understanding of the deep prehistoric and historical associations of their lands. Landowners knowledgeable regarding all cultural resources on their lands would also be better able to avoid and protect such resources.

Please let me know if you have an opinion regarding the above. For now, we plan to provide the above specified landowners with GPS points for tribal sites identified on their lands. However, we will share additional information with them if you deem this appropriate.

Regards,

-Cathy

Dear THPOs,

Some of you have indicated availability for a 1:00PM/11:00 AM call on Monday, July 21st to discuss data sharing of the survey information, but I haven't heard back from most of you if that time and day works. Please let me know if you are available. We hope to have a short call to discuss:

- Data sharing with landowners along the Colstrip alternative for sites on their property
- Data sharing with the MT SHPO
- Language to use in the Draft EIS, which will be distributed to the public

We can use the usual call in number, 1-877-423-6338, Passcode: 364456#

Thanks very much, and have a great weekend!

Rick

Subject: TRRR-data sharing dicussion

Dear THPOs,

On Monday's monthly call, Conrad suggested we have a discussion among the THPOs about the best way to share survey data with the landowners along the Colstrip alternative. We were hoping to set up a call with you all during the week of July 21st. Please let me know if there are any days next week that you could not make the call, and we'll schedule the call for the best day. I would suggest the time of 1PM EST/11AM MST for scheduling purposes.

Also, would you like us to invite the MT SHPO to the call, or just limit it THPOs?

Thanks and we look forward to hearing from you,

Rick
