Hi Mr. Miller,

It was nice speaking with you this morning. First and foremost, congratulations to you on being hired as the new Yankton THPO! I look forward to working with you as we move through the various stages of the Tongue River Railroad Construction Project.

As I mentioned on the phone, it would be a good idea to peruse the Tongue River Railroad website in order to get up to date on the project. Here is the [link](#). Rick Starzak, with ICF International, Inc., is assisting the Board with the cultural resources portion of the project and will also want to touch bases with you. I am copying him here so that he is aware of your new status as the Yankton THPO. I will also let him know that you would like a copy of the meeting notes from our Section 106 call this past Monday.

You can also look up documents on the [STB web site](#). The documents will be shown under Docket No. FD 30186. The project website (historic preservation page) will provide you with more specific instructions on ways to assess the Tongue River Documents.

I look forward to meeting you. In the meantime, feel free to contact me via email, nadalsc@stb.dot.gov, or phone at 202-245-0293 with any questions you have regarding the project.

All the best,

-Cathy
