Hi Barbara,

I have completed my review of the revised PMRE Survey Report. Overall, I find that the report is much better and I have very few comments this time around. Thanks so much for doing such a great job on the revision.

My only major comment pertains to your future plans for further documentation of Site TYO-00276. I do not think it is necessary to contribute resources toward additional documentation of the site. This would only be necessary if you intend to use the Haul Road and/or cause an adverse effect to the resource. Otherwise, assuming eligibility should be sufficient as long as the site is in no way impacted by the construction project.

Also, if any additional documentation is conducted at the site, both the STB and SHPO would need to be consulted in this effort (see page 17).

In addition to the above, I would suggest defining "modern" in the report.

Thanks again!

-Cathy
