Subject: Uinta Basin Railway EIS

Jeff,

I hope you're doing well. Because of Moffat County's interest in the Uinta Basin Railway project (Docket No. 36284), I wanted to let you know right away that the Surface Transportation Board issued the Final Scope this morning for the EIS. The document is up on our website at www.stb.gov under Recent Decisions, but I can send you a .pdf copy if that would be helpful. As the document explains, we have concluded that the Craig Route is not a reasonable and feasible alternative for the proposed railroad. This decision was based on many factors, including those presented by the Seven County Infrastructure Coalition in their September 4, 2019 letter to us. Please feel free to give me a call if you have any questions about this decision or the other information in the Final Scope. Thanks as always for your participation in and assistance with the Board's environmental review process.

Best,
Josh
