Hi Mark,

To open the .kmz files, you will need to download GoogleEarth. It is free to download at <https://www.google.com/earth/>. Let me know if you are still having problems.

Best,

Josh Wayland

Hi Josh,

I see that you put them up now. I tried to get them to work and it wanted

me to download a program. I got the program almost downloaded and then it

said it didn't do it right. The program is Free Editor. If I can get that

downloaded will I be able to open the files?

Mark

Mr. Fix,

I just wanted to let you know that the .kmz (GoogleEarth) files of the

alternative alignments have been posted on the Tongue River Railroad project website at <http://www.tonguerivereis.com/map.html>. These are

the
same routes that are shown in the interactive map. I hope they are
helpful!

Hi Josh,

I understand that the latest up to date maps are on the interactive
site.

One of the people in the Ashland area asked why a specific person
who had a

house crossed by the alignment was not shown in the photos of the
residences

crossed. I thought that we could look at the maps and see that.
Unfortunately the interactive maps are not enough detail to see
that. The

google earth maps were. I don't know if you can update the Google
Earth

maps with the latest alignment, but that would probably be the best
for

folks to see where the routes are going now.

Mr. Fix,

My name is Josh Wayland; I am with the Surface Transportation Board's Office of Environmental Analysis. Vicki Rutson asked that I reach out to you to make sure that you were able to access the maps of the alternatives for the Tongue River Railroad project. The final maps from the Draft EIS have been published as an interactive web map that you can find on the project website at <http://www.tonguerivereis.com/map.html>. Please feel free to call me at the number below if you are having any trouble using these maps or if you would like me to send you the maps in a different format. Just let me know what I can do to help!
