Subject RE: Pt. MacKenzie Rail Extension - Request for fisheries data

Hi Maria,

The data will be on their way today or tomorrow.

The study plan and collection permit are included on the DVD – both describe purpose. Methods are described in the study plan. Scope was to visit all crossings potentially containing fish habitat – with an emphasis on ground site visits to all stream crossings containing or potentially containing anadromous fish to characterize habitat at the crossing location. No technical report was prepared – data were used to prepare the sections and appendices for the Port MacKenzie Rail Extension EIS.

Data locations are within the spatial databases. Field data sheets, site maps, and site photographs are organized within folders for each site.

Thanks,
Lynn

Subject: Pt. MacKenzie Rail Extension - Request for fisheries data

Hello Lynn,

As we discussed on the phone, we are evaluating the existing data on fisheries resources in the project area in advance of receiving Title 16 Fish Habitat permit applications from the Alaska Railroad for the stream crossings. We've reviewed the information in the Draft EIS but would like to get a copy of the fisheries data that Entrix collected. We are also interested in the scope, methods, and purpose of the surveys. Was there a technical report prepared? If so please send us a copy. As you mentioned, I think the easiest way to get it to us would be on a CD mailed to the address below.

Thank you for your assistance with this project.
