

SURFACE TRANSPORTATION BOARD
Washington, DC 20423

Office of Environmental Analysis

February 6, 2013

[Name]
[Address]

Dear [Landowner]:

I am writing to you with an update of the environmental analysis currently underway by the Surface Transportation Board's (Board) Office of Environmental Analysis (OEA) regarding the proposed Tongue River rail project. By way of background, on October 22, 2012, OEA published a Notice of Intent to prepare an Environmental Impact Statement (EIS) for the Tongue River Railroad's (TRR) proposal to construct and operate a new rail line from two mine sites near Ashland, Montana, to an existing Burlington Northern Santa Fe (BNSF) rail line near Miles City, for the purpose of transporting coal.

OEA began the "scoping" process by publishing the Notice of Intent to prepare the EIS. Through this process, OEA asked the public to assist in identifying the environmental issues that should be analyzed in the EIS. OEA also asked the public to assist in identifying alternatives to TRR's then-preferred alignment, the 83-mile rail line that would largely follow the Tongue River north from Ashland to Miles City. During the scoping process, which concluded on January 11, 2013, OEA held ten public meetings in Montana and received more than 2,500 oral and written comments. On December 17, 2012, the Board received a supplemental filing from TRR identifying its new preferred alignment as the Colstrip alternative, a 42-mile line from the two mine sites near Ashland, to an existing BNSF rail line at Colstrip. Finally, during scoping, some commenters also suggested that the EIS analyze a rail alignment that would run south of Ashland toward Decker, Montana.

OEA is currently developing the Final Scope of Study that will list the environmental issue areas and alternative rail routes that the EIS will address. Following issuance of the Final Scope of Study, we will be asking you for permission to access your property so that we may conduct surveys to find out what sensitive environmental resources, including cultural and historic resources, may be affected by TRR's proposal. These surveys will be conducted by OEA's environmental consultants, ICF International, and will not involve TRR.

In a forthcoming letter we will ask you for permission to access your property and explain what surveys we need to conduct on your land, how the surveys would be conducted, what would be done to protect your land from any affects during the survey work, and how long the surveys would take to complete. We will include contact information so that you can speak

with a person who can answer your questions and give you the information that you need to help make your decision.

My staff and I, as well as our consultants, realize that entering your land is a privilege. If we are fortunate enough to receive access from you, we will respect your rights as a landowner at all times. We will consider any special conditions that you wish to impose concerning access to your property. If you wish, you or your representative may accompany the field crew to observe the survey activities.

Thank you for your consideration. I deeply appreciate your time and trouble during what can be a difficult process. Your participation will allow OEA to conduct a thorough analysis of the environmental issues, which will provide the Board members with the best information possible when making their decision on whether or not to approve the project. If you have any questions before we contact you again, please do not hesitate to call Chris Moelter of ICF International, our independent third-party contractor for the EIS, at 503-525-6145.

Sincerely,

A handwritten signature in black ink, appearing to read "Victoria Rutson". The signature is fluid and cursive, with the first name "Victoria" and last name "Rutson" clearly distinguishable.

Victoria Rutson
Director
Office of Environmental Analysis
