Re: Finance Docket No. 33407, Dakota, Minnesota & Eastern Railroad Corporation Construction into the Powder River Basin: Section 106 PA Extension

Dear Ms. Archabai,

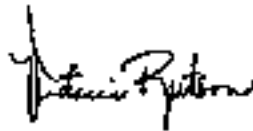

As you know, the Section 106 Programmatic Agreement (PA) for the Dakota, Minnesota & Eastern Railroad Corporation Construction into the Powder River Basin project will expire on May 15, 2008. Consequently, we are extending the PA to ensure that its provisions remain in effect. We have attached a PA Extension document which, once executed, will ensure that the current PA will remain in place for another 10 years, or until May 15, 2018. The PA Extension will take effect once it is signed by all of the current PA signatories. However, we encourage all those that did not sign before to do so now. All signatories to the PA Extension will have the same rights under the current PA as its original signers.

Ms. Catherine Glidden of my staff has explained to me your interest in reopening the PA. I am eager to hear any proposed revisions that you would like to suggest and believe that that process can occur most efficiently and effectively through the mechanisms set forth in the PA itself. As a signatory to the PA, you have the right to propose amendments and revisions, which would be carefully considered by all the signatory parties.

Please return your signed copy of the document to Catherine Glidden of my staff no later than April 25, 2008. Once we receive all the signed copies, we will forward them to the Advisory Council on Historic Preservation (ACHP) for signature. The PA will be formally extended once the ACHP has signed the Extension. All parties will receive copies of the final signed document.

If you have any questions regarding the PA Extension document, please do not hesitate to contact me at 202-245-0295 vrutson@stb.dot.gov or Catherine Glidden of my staff at 202-245-0293 (Glidden@stb.dot.gov). Thank you for your continued interest in this project.

Sincerely,

Victoria Rutson, Chief

May 14, 2000

Vickie Brown, Chief
Division of Environmental Analysis
Surface Transportation Board
Washington, DC 20430

RE: STB Pioneer Decision 2000-2, Dakota, Minnesota & Eastern Railroad Corporation, Powder River
Shore, Shiprock Project, Programmatic Agreement

Dear Ms. Brown:

The national agreement regarding the Shiprock cultural project has been executed by the ACHP. This
action establishes the terms of the ACHP entered by Section 106 of the National Historic
Preservation Act and the Council's regulations. Please provide a copy of the fully-executed agreement to
the other signatories and your National Preservation Officer.

The Council appreciates your cooperation in reaching a satisfactory resolution of this matter. You and
your staff have been a pleasure to work with. Should you have any questions, please contact me at
202/509-5118 or via e-mail at achp@nps.gov.

Sincerely,

Carol O'Connell

for information on any course please call 01945 466 1000, fax 01945 466 1001 or e-mail enquiries@bham.ac.uk or write to: Academic Registrar, University of Birmingham, 4th Floor, 222 Edgbaston Park Road, Birmingham B15 2TT. We will be pleased to help you.

4. IDENTIFICATION PLAN

The purposes of the present study were to determine the effects of a 12-week training program on the cardiovascular and metabolic responses to a 1000-m sprint in young, healthy, sedentary men. The subjects were 12 men, aged 20-25 years, with no previous experience of organized sport. They were selected from a group of 20 men who responded to an advertisement in a local newspaper. The subjects gave their informed consent to participate in the study, which was approved by the local ethics committee.

The Signatories and Bureau Employees in this Agreement document their Mutual properties will be identified in accordance with the ID Plan (Attachment A) which was developed for this project in consultation with the Federal agencies, GPO, and another broker. Names will be identified in accordance with each individual's file and a list of which countries is a

ICD shall prepare indicative survey and national response (NCR) evaluation, recommendations (Report), and findings of action for those areas reviewed as indicated in the ID Plan. Separate reports will be prepared for each of the times of the year. These reports will be prepared for South Dakota with one for Wyoming and Minnesota. Two reports will be prepared for the states covering the existing system and one covering the new construction. Reports will include the results of baseline survey, intensive and maintenance surveys (in the version that occurs this time), and the synthesis recommendations regarding national resources. Surveys of very different military facilities or resources, or sub-activities or areas on which the new construction is under construction, positions found to be necessary after completion of these reports will be addressed to sub-element reports and tabulated in the portion that reviewed the

STN shall provide Klamath on the surveys conducted in accordance with the TD Plan as follows: the TSPS, BLM, COR, and BOR (will notify the Federal agencies) and the Department of the Interior (will notify the State of Oregon). The Tribal(s) representative(s) will be designated by the Tribe(s) (jointly or the Tribal representative), and the appropriate NPSOs. Those providing parties may remove the impacts and comments upon them to the STN as provided below. Comments shall address the adequacy of the NEPA survey results, the sufficiency of cultural resources identified during the intensive survey activities on the NITSP, and the effects of the project on any cultural resources considered to be historic resources.

A-3.1 Report Reviews by District, Federal Agencies and Third-Party Consultants

ETA shall provide Reports on a regular basis to DOL, the Federal agencies and appropriate third representatives for comment review. DOL will have a 15-day review and comment period. DOL's comments will be forwarded immediately to the relevant Federal agency and appropriate third representatives for confirmation. During the review of the Reports, third representatives for confirmation shall be invited to review the Reports.

Based on the comments received, the STB may revise the Report(s) or may conduct additional investigative activity, as needed. Any revised Report(s) will be submitted by the STB to DASH for a second 15-day review period and to the Federal agencies and appropriate Tribal governments for a second 30-day review period.

4.3.2 Bewertung Verfahren der Strömung

A-3.2. [Zurück zur Startseite](#)

A.5.4 Additional Turbidity

Interviews surveys resulting from public participation, or of any additional military facilities or exercises can affect the new interpretation of the environmental policies followed by the community after adoption of the Espoo Convention, will be presented as addendums to the original Report(s) and will be submitted to the 2000 Reviewing parties. Additional reports will be reviewed as outlined in Regulations A.3.1 and A.3.2.

- The STEC shall forward a copy of the Summary to the Director of the National Personnel Administration for publication in accordance with 34 CFR 800.40(a)(2).
- A Federal agency with jurisdiction over the involved leader objects to writing within 30 days to a finding of eligibility, or
- An individual does not accept traditional religious and cultural differences to a primary objective in writing within 30 days to a finding of eligibility regarding that property; and
- The STEC is unable to resolve the eligibility determination with the involved individual and the OIG's

If after full review by the appropriate Federal agencies, appropriate Tribal representatives and appropriate SEP-ON, the counterpart area or portions of the counterpart area have been determined by SEP-ON to be negative for historic or prehistoric archaeological resources, the Report will be accepted by the SEP, appropriate Federal agencies, and the Tribe(s). If the Report(s) have been accepted by the SEP, appropriate Federal agencies, and the Tribe(s), appropriate SEP-ON, and appropriate Tribal representatives, that construction of project facilities in those areas may be allowed under the SEP-ON. If the Report(s) are not accepted by the appropriate Tribal representatives, the SEP-ON, or the appropriate Federal agencies, the project will be resubmitted to the appropriate Tribal representatives, the SEP-ON, and the appropriate Federal agencies for review.

LYNN

Upon completion of board member activities, and as early as reasonably feasible following development, the STE will develop a Treatment Plan for each property, covering all clearly related properties, an category of properties determined to constitute a historic property. Each Treatment Plan will be developed in consultation with the appropriate Federal agency(ies), the appropriate SHPO(s), and appropriate Tribal representatives, EPCAS, and the Council. If requested by a SHPO(s), this coordination will facilitate a meeting with SHPO representative(s), and the BRET may deem appropriate, to further review the framework for how treatment plans will be developed, and to review opportunities and circumstances that may result in or minimize adverse effects to a historic property, group of closely related historic properties, or category of historic properties. Any unresolved objections that result from these consultations shall be addressed in accordance with Subsection 14.

Each Transmogrifier Plan will address its telepathic property adversely affected and so it intends to mitigate the corresponding effects where the STB, in cooperation with the appropriate Federal agencies, appropriate SRO(s), transmuting Triad member(s) and other personnel determine it is not feasible or prudent to avoid effects project violations. The Transmogrifier Plans will adhere to the principle of the U.S. Treaties of Antisubversive Propaganda at Headquarters, Parts I and II, the "policy of the Interior's Security and Guidelines for Subversion and Espionage Activities" (Federal Register, Vol. 48, No. 190, September 20, 1963, pp. 44716-17) and appropriate SRO guidelines. The STB will ensure the relevance to be assessed will be responsive to the concerns of the Counseling Period (as noted in the Glossary to this document).

The Treatment: Plans for the manufacturing will not be limited by

Specification of all historic properties to be affected by this project, including a description of the nature of the effect.

A detailed description of the materials prepared for kinetic studies is given in Table I. The polymers were prepared by the method of Kricheldorf and Schuler.¹⁰ The polymers were characterized by their inherent viscosities in chloroform at 30°C. The polymers were characterized by their inherent viscosities in chloroform at 30°C. The polymers were characterized by their inherent viscosities in chloroform at 30°C.

As technological research designs for virtually universal programs eligible for the VOTIP under 36 CFR Part 64.4 criteria (4) will be developed, the research designs will identify and evaluate the following:

- * When data recovery is determined by the STS to be appropriate and/or necessary, personnel operations to be employed through the data recovery efforts (using data consolidation and data recovery is an effective effort).
- * The location of the symposiums of the above research efforts.
- * Data needed to explore the greatest need.

- Properties and portions of these properties to be further investigated
- Methods used to collect data needed to explore the research question posed, when the adverse effect of data recovery is feared the appropriate procedure
- Laboratory methods used in the examination of the physical material that is recovered
- Proposed disposition of the recovered materials and records.
- The timing for the preparation and distribution of reports

6. Summary

The properties for searching about the material and disposition of Native American human remains and associated grave goods, if understood, in accordance with the ID Plan and Subpart 18 and 19.

7. Methods

A description and rationale for selection of the work proposed for collaboration involving (a) qualified archaeologists in contact with the Secretary of Interior's Professional Qualifications and Standards (48 FR 27716 September 1993) and qualified Tribal/intertribal American Indian Members present to observe good practices involved during the actual excavation activities and appropriate inspection conducted by a qualified archaeologist of areas of ground disturbance after specific phases of construction are completed.

8. Disposition of Information

The Treatment Plan must contain provisions for the creation of a public account for disseminating the results of the Treatment Plan to the public. These publicly accessible will be accessible with the Archaeological Resources Protection Act (ARPA), Executive Order on Sacred Sites (May 28 1994) and the ID Plan, NACPSA, the President of the American Act (ARPA), and Section 304 of the NHPA (16 U.S.C. 4304-3).

9. TREATMENT PLANS - REVIEW

9.1 DEVELOPMENT AND REVIEW

The STB will develop, in accordance with the appropriate Federal agency (a), appropriate SHPO(s), and appropriate Tribal representatives (b), and the Treatment Plan to ensure that it addresses the concerns of the appropriate Federal agency(s).

appropriate SHPO(s), appropriate Tribal representatives(s), and DMARS in accordance with Subpart 18.1(b).

STB shall provide Treatment Plan(s) to DMARS, the appropriate Federal agency(s), appropriate SHPO(s) and appropriate Tribal representatives(s) for comment and review. DMARS will have a 15-day review and comment period. DMARS's comments will be forwarded additionally to the other appropriate reviewing parties for consideration during the review of the Treatment Plan(s). The appropriate Federal agency(s), appropriate SHPO(s), and appropriate Tribal representatives will have a 10-day review and comment period. If any appropriate reviewing party to this Agreement fails to comment within the review period, the STB shall assume that reviewing party's concurrence. Based upon comments received, revised Treatment Plan(s) will be prepared and submitted to all reviewing parties.

9.2 REVISOR TREATMENT PLAN(S) REVIEW

The revised or S revised Plan(s) will be submitted by the STB to the appropriate Federal agency(s), appropriate SHPO(s), and appropriate Tribal representatives(s) for a 10-day review and comment period. If any reviewing party has an objection to the S revised Plan(s) they shall notify STB within the 10-day comment period. The STB shall assume that reviewing party's concurrence if no objection is received within the 10-day comment period. Based upon comments received, revised Treatment Plan(s) will be prepared and submitted to all reviewing parties.

9.3 PUBLIC INFORMATION

The STB shall take appropriate steps to provide opportunities for members of the public to express their views on the Treatment Plan(s). Opportunities for public input may include the distribution of Treatment Plan(s) for public comment upon concurrence of the appropriate SHPO(s), and public meetings, limited by DMARS, to explain how the Treatment Plan(s) were developed and to discuss the proposed removal or alteration of an historic property, and other modifications to the historic character of the existing DMARS rule. Any public comments received will be considered in accordance with the appropriate SHPO(s), in determining the need for Treatment Plan(s) revisions. Any subsequent revisions to a Treatment Plan(s) will be reviewed in accordance with Subpart 18.1(c).

10. TREATMENT PLANS - IMPLEMENTATION

10.1 CONSTRUCTION PLAN

Upon SHPO concurrence, each Treatment Plan will be incorporated by DMARS into their Construction and the Plan required for the project right-of-way on Federal lands, and the STB and the appropriate Federal or state agency shall provide notification to proceed with the implementation of the Treatment Plan on lands under their jurisdiction. DMARS or the authorized representatives will obtain ADPA and/or NHPA and NHPA permits for Federal lands and/or required state permits.

Termination of the project after initiation of the Treatment Plan(s) will require completion of any work in progress, and submission of each Treatment Plan as described below.

2.3. AGREEMENTS

Amendments to the Treatment Plans will be incorporated by written agreement among the STB, the appropriate BPO(s), appropriate Tribal representatives(s), DMRB, and the Council. The appropriate Federal agency(s) will also be party to the written agreement if their managed lands are involved. Amendments to the appropriate ANCA permits will be introduced as part of the approval of the amendments.

2.3.3 DMRB or all other Federal agencies shall prepare a program report(s) to the STB, appropriate BPO(s), and appropriate Tribal representative(s) every two weeks documenting progress in the implementation of each Treatment Plan. The appropriate Federal agencies will be provided with a report every two weeks if their managed lands are involved or if requested. These progress reports will include:

- Dates of sightings were included in the program reporting period.
- Illusive populations when treatment was conducted
- Type and amount of treatment performed.
- Brief summary of the treatment results during the period covered by the report
- Comments or observations of the field staff not negligible for plan implementation.

2. CHANGES IN ANCILLARY ACTIVITIES/CONSTRUCTION SCHEDULE-WAY

The STB will notify the appropriate Federal agency(s), appropriate BPO(s), appropriate Tribal representative(s) of changes in the size or location of ancillary areas or the construction schedule-way that may become necessary during which construction of any changes result in the use of managed areas, the STB will ensure that those areas are subject to landowner survey in order to locate any potentially significant cultural resources and that those resources are evaluated for NHP eligibility. The reports addressing these areas will be reviewed in accordance with BPO(s) and Tribal representatives. Plans will be developed in accordance with Subchapter 2 and 3 and implemented for those plans, structures, buildings, bridges and other objects determined to be Historic Properties.

2. CONSTRUCTION AREA WITH HISTORIC PROPERTIES

In those areas where Historic properties are present, the STB will be notified and will provide the results of the treatment Treatment Plan to the appropriate BPO(s) when implementation of the Treatment Plan is completed. Within 45 days of this notification of Treatment Plan completion, the STB, the appropriate Federal agency(s), appropriate BPO(s), appropriate Tribal representative(s), will be invited to inspect the site of the historic property to verify that Treatment Plan implementation is complete. Upon completion of inspection, the STB will notify the appropriate BPO(s), appropriate Tribal representative(s), the Council and DMRB. There will be a 30-day period for review and comment on the report. The Final Cultural Resources Report will be prepared within 120 days of receipt of the comments from the appropriate Federal agency(s), appropriate BPO(s), appropriate Tribal representative(s), and the Council.

2. DOCUMENTATION OF TREATMENT

The STB will prepare a report documenting the implementation and results of the Treatment Plan(s). This report will be the final Final Cultural Resources Report for the project. The report will contain a detailed account of the information gathered during implementation of the Treatment Plan(s), and the effectiveness of the work measures implemented to address the adverse effects of construction. A review copy of the report will be distributed to the appropriate Federal agency(s), appropriate BPO(s), appropriate Tribal representative(s), the Council and DMRB. There will be a 30-day period for review and comment on the report. The Final Cultural Resources Report will be prepared within 120 days of receipt of the comments from the appropriate Federal agency(s), appropriate BPO(s), appropriate Tribal representative(s), and the Council.

2. DISCOVERY

If a previously-undiscovered archaeological, historical, or cultural property is encountered during construction, or previously-known properties will be affected in an unanticipated manner, all activity will cease within 100 feet of the property to avoid or minimize harm to the property until the STB, in consultation with the appropriate Federal agency(s), appropriate BPO(s), and appropriate Tribal representative(s), can evaluate and, if necessary, conduct steps to mitigate impacts to the area discovery. Evaluation and mitigation will be carried out by the STB in consultation with the appropriate Federal agency(s), the appropriate BPO(s), appropriate Tribal representative(s), DMRB, and the Council as expeditiously as possible in accordance with 36 CFR 400.13(b).

2. CONFIDENTIALITY

All information and involved personnel shall adhere to strict data, including data regarding the location and nature of historic properties and properties of religious and cultural significance are protected from public disclosure in the present and future permitted by law, including enforcement of Section 204 of the NHPA, as amended and Section 3 of the ANCA, and Executive Order 60800 dated May 24, 1995.

A. HUMAN REMAINS

1.6. NOTIFICATION OF UNDETERMINED

Human remains are maintained in Federal lands, the STB shall notify the appropriate Federal land management agency, other consulting agencies if requested, appropriate State, and designated NAGPRA tribal entities. Treatment and disposition of remains and associated grave goods will be consistent with the policies outlined in the ID Plan, Subpart 11.1 and applicable Federal and state laws. If human remains are recommended for study or analysis, the STB will notify and consult with the appropriate NAGPRA, and appropriate Tribal representatives. Treatment and disposition of remains and associated grave goods will be consistent with the policies outlined in the ID Plan and applicable Federal, state and local laws.

1.7. REINTERMENT

STB will ensure that every effort is taken to avoid disturbing known human burial sites. Where avoidance is not possible, and in consultation with appropriate Tribal representatives, remains will be reinterred prior to construction and treatment in accordance with tribal procedures outlined in the ID Plan and any applicable Federal and state laws.

1.8. DISCOVERY

If human remains are inadvertently discovered during construction activities, all construction will cease within 24 hours in all directions of the human remains and the STB will immediately notify the appropriate parties in accordance with the ID Plan. Human remains and grave goods will be treated in accordance with the ID Plan.

B. CULTURAL

1.1. PRE-RECORD

STB shall conduct surveys of all records and other archaeological items including from identification and data recovery efforts is completed in accordance with 36 CFR Part 79, and the provisions of 43 CFR 101 (NAGPRA). STB shall ensure that documentation of the location of these materials is preserved. STB shall ensure that appropriate State and Tribal representatives involved in the STB's activities will be notified 10 days of recording. All archaeological items will be recorded from Federal lands shall be recorded in accordance with the ID Plan.

1.2. PRIVATE LANDS

Private landowners will be encouraged to create archaeological records recovered from their lands in accordance with the ID Plan. Materials from private lands to be returned to the private landowner shall be returned in accordance with 36 CFR 101.79 and all necessary analysis has been completed. STB shall document the return of materials to private landowners and submit copies of this documentation to the appropriate State and Tribal representatives for their records.

1.3. STATE LANDS

STB will ensure that all cultural materials discovered on state lands will be recorded in accordance with the ID Plan.

C. AUTHORITY

Compliance with the provisions of this Memorandum of Understanding does not relieve the STB or other Federal agencies of their responsibilities to comply with other legal requirements, including those imposed by the NAGPRA (25 U.S.C. Sections 3001 and 43 CFR 101), the ABIA (18 U.S.C. Section 470 and 4701), and the NHPA (42 U.S.C. Sections 4321-4347), and applicable Executive Order.

D. DISPUTE RESOLUTION

Should any disagreement arise within 30 days to any action proposed or any document provided for review pursuant to this agreement, the STB shall consult with the relevant agency to resolve the disagreement within the time specified in this document. If the STB determines that the proposed action is not consistent with the NAGPRA, the STB shall suspend all construction activities to the dispute. Within 30 days after receipt of all pertinent documentation, the Council shall submit a report to the NAGPRA, which STB shall take into account in reaching a final decision regarding the dispute. If the STB shall not consent to an action within 30 days, the Council shall suspend the proposed action. If the STB shall not consent to an action within 30 days, the Council shall suspend the proposed action. If the STB shall not consent to an action within 30 days, the Council shall suspend the proposed action.

Any recommendations or comments provided by the Council will be considered by the STB to the best of its ability. The STB's responsibility to carry out all actions under this Agreement shall be subject to change with respect to changes in the NAGPRA.

E. AGREEMENT

Signatures to this Agreement shall indicate that it is intended, whereupon the signature will constitute an agreement with 36 CFR 101.79 to consider such agreement.

G. TERMINATION

G.1. AGREEMENT

The STB, Council, SERPO(s), or DMAB may terminate this Agreement by providing 30 days written notice to the other Signatories; the Signatories shall immediately bring the 30-day notice period prior to termination to each Signatory at each meeting or other action the would would terminate. If the STB, Council, or DMAB individually terminate their participation in the Agreement, then the Agreement is terminated by the majority. If a SERPO terminates its participation in the Agreement, that termination shall only apply to the state under that SERPO's jurisdiction. In the event of termination, the STB, SERPO(s), and DMAB and comply with 36 CFR 100 subject B.

G.2. TERM

The term of this agreement shall be five (5) years from the date of execution unless otherwise stipulated, in accordance with Subpart G.1, as amended by the Signatories.

H. FAILURE TO CARRY OUT THE TERMS OF THE AGREEMENT

In the event that the terms of this Agreement are not carried out, the STB and all other appropriate Signatories shall comply with 36 CFR 100 subject B with regard to individual actions covered by this Agreement.

I. EXECUTION AND IMPLEMENTATION

This Programmatic Agreement shall take effect when executed by the Council, STB, appropriate SERPOs, BLM, BLM, COR, and BOR. Signatories and implementation of this Agreement constitutes that the Council, STB, SERPO, BLM, COR, and BOR have entered into this MESA Section 106 responsibility for all traditional nations of the DMAB's Powder River Basin Expansion Project.

Glossary of Terms/Acronyms

Adverse Effect

When an undertaking may alter, directly or indirectly, the characteristics of a historic property that qualify the property for inclusion in the National Register as a historic site, building, or object, through the loss of the property's location, design, setting, materials, workmanship, feeling, or association. Adverse effects may include reasonably foreseeable effects caused by the undertaking that may occur later in time, be further increased in duration or be cumulative.

APR

The Area of Potential Effect (APE) is the geographic area within which the project may cause physical, visible or audible effects to the historic site or its historic properties. It includes all areas of construction, such as right-of-way (ROW), staging areas, access roads, roads, bridges, access roads, borrow areas, and other military facilities. The area of potential effects is determined by the scale and nature of the undertaking and may be different for different kinds of effects caused by the undertaking.

Archival Areas

A general term that covers any additional areas that may be affected by the undertaking.

Area of Potential Effect

See APR.

Associated Primary Objects

Objects for which the historic site is known to have been used or associated with. Information is also in the possession or control of a museum or Federal Agency. The term includes those historic objects and cultural properties that were used for military purposes or to maintain human populations and those cultural properties that are a part of a historic site.

Borrow Areas

An unincorporated area where material has been or will be dug for use in the construction of the project.

Consulting Parties

Consulting parties include NEPCO/TERPCO, Indian tribes, representatives of local governments, applicants for Federal licenses, permits, licenses, and other approvals, and other individuals and organizations with a demonstrated interest in the undertaking.

Cultural Resources

A cultural resource is any archaeological or historic site, building, structure or object in American history, prehistory, engineering, architecture, or culture. This term includes artifacts, records, and remains that are related to

Page 22 of 27

and bonded with a polypropylene. The bars also incorporate properties of thermoplastic resins and exhibit superior resistance to acids. Unlike most epoxy resins, a National Engineering Institute

Additional registered entities are similarly authorized by the Secretary of the Interior for use in conducting the eligible library

of properties for the National Register (36 CFR 60). The criteria are listed below:

The quality of significance to American history, architecture, archeology, and culture is present in districts, buildings, structures, and objects of state and local importance that possess integrity of location, design, setting, materials, workmanship and feeling and

- a. that are associated with the events that have made a significant contribution to the broad patterns of our history; or
- b. that are associated with the lives of persons significant in our past; or
- c. that embody the distinctive characteristics of a type, period, or method of construction, or that represent the work of a master, or that possess high artistic value, or that represent a significant and distinguishable entity whose components may lack individual distinction; or
- d. that are prehistoric, or have the ability to yield information on prehistory or history.

Criteria considerations, specifically concerning, but not limited to, graves of historical figures; properties owned by religious institutions or used for religious purposes; structures that have been moved from their original locations; reconstructed historic properties; and properties that have achieved their significance within the past 50 years shall not be considered eligible for the National Register of Historic Places (36 CFR 60.6).

National Register of Historic Places

Departmental Safety & Health Administration

Progressive Agreement

A property is eligible for the National Register of Historic Places if it is a significant historic resource of the United States and its people, and is worthy of the national historic landmark status. A property is eligible for the National Register of Historic Places if it is a significant historic resource of the United States and its people, and is worthy of the national historic landmark status.

Site

A representative survey is an examination of all or part of an area encompassed in an official record to make generalizations about the types and distributions of historic properties that may be present.

Small Aerials Digital Image photographs with dimensions of the construction might identify unrecorded and non-referenced.

Small Historic Preservation Office

A small circular unit excavation, approximately 40 centimeters in diameter that is dug to a uniform depth to reach culturally undisturbed soils.

Site Definition is different for each area but is generally defined by "utility and building (BIBB) as any reasonably definable spatial unit that contains features or is fairly consistently covered with artifacts that are indicative of its occupation 50 years or older. A site may be defined as "special cluster of cultural features, or items, or both" (Bland 1972:46). These definitions apply to both prehistoric and historic sites. Archaeological surveys may be defined by the location of any of the following: (a) standing, measured five-footed rock, masonry, concrete, or a concentration of materials within a reasonably defined spatial boundary.

THPO

Traditional Cultural Properties

Those areas outside the construction disturbance area used for storage of supplies and equipment used for construction.

Surface Transportation Road

See Evaluation setting

Traditional Historic Preservation Officer appointed or designated in accordance with the Act is the official representative of the nation for the purpose of Section 106.

A traditional Cultural Property can be defined generally as one that is eligible for inclusion in the National Register because of its association with cultural practices or beliefs of a living community that (a) are rooted in that community's history, and (b) are important in maintaining the continuing identity of the community.

Twentieth Five

A proposal for the mitigation of efforts upon any historic property that a project would affect. It can include loss property, decomposition, restoration or other measures.

**Unassociated Restroom
Objects**

Those restroom objects for which the human remains with which they were placed historically are not in the possession or control of a project or Federal agency. Objects that were displayed with individual human remains as part of a death site or ceremony of a culture and subsequently returned or distributed according to traditional custom to living descendants or other individuals are not considered unassociated restroom objects.

Underwriting

An underwriting is a project activity, or program funded in whole or in part under the direct or indirect jurisdiction of a Federal agency, including those carried out by or on behalf of a Federal agency, those carried out with Federal financial assistance, those requiring a Federal permit, license or approval, and those subject to state or local regulations provided to a delegation or approval by a Federal agency.

4.1.4 Construction Management and Construction

Useful numbers and webpages for the new construction #3 include:

1. Multi-city of Negro cultural (musical) groups records events and programs and through cooperation with the SPCO, TROOP leaders examine representative designated by the others, other identified community people, and Federal agencies in accordance with 36 CFR 600.4.
2. An intensive survey of the community SPCO plan 20 day color sets of the forced concentration SPCO.
3. An intensive survey of all the board areas, board areas, board areas and beyond, during which, but other auxiliary areas related to the work.
4. An intensive survey of the construction SPCO to identify all cultural resources. Finding will be done to evaluate cultural resources within SPCO eligibility within 36 CFR 600.4. The guidelines in National Park Service Bulletin 34 and 35 SPCO shall also be considered when conducting all the SPCO eligibility. It is the opinion of the committee and the cultural resources representative designated by the others, the cultural resources is to be recommended as a historic property, significant resources to National Treatment Program shall be obtained. The subject matter representative designated by the others will only make recommendations on cultural resources having a historical or historic Native American component. No heritage of black resources shall be submitted without a written plan and SPCO consultation and approval. A geographical survey of the construction SPCO will be conducted to identify areas where black cultural resources may exist and other deep welling may be necessary to identify cultural resources. The geographical survey will also recommend appropriate neighborhood areas and sites in relation of cultural resources within SPCO eligibility criteria (36 CFR 600.4) by providing identification of the SPCO, and characteristics, and finding and analysis of the probability of the units to create cultural material.
5. A recommended level survey of these areas outside the ground disturbance areas where there is no potential for the construction to have an adverse effect, as defined in 36 CFR 600.4. (a) Historic properties Identification of these areas will include consultation with the SPCO. The National resource representative designated by the others, TROOP, other related construction sites, and National resources

Many studies have originally identified vehicles as the APE but potentially affected by the confounding reason, be identified by the STPC, DAPD-treated primary hepatocytes were separated by two tubes, DMSO, other identified remaining portion, and Fetal Hepatocytes. The Surface Transmembrane Band (STB) will contact with the BPO. DAPD-treated surface transmembrane band for the tubes, DMSO, other identified

STANDARDS AND OBJECTIVES

[illegible]

If there are anticipated discrepancies of cultural resources due to archeological investigations, the Agency Official (OIA) will notify the responsible State or Federal agency in accordance with 36 CFR 800.13. Prior to conducting any work, a permit is required, the Cultural Resources Management project (Cultural) is initiated. Professional Geologist and Biologist study obtain any necessary permit, while and local residents are notified.

1. Introduction

AAU reports for the 20 Plus will be submitted in two parts designed to let our report stand on its own. Each report will be available from the surface before the report is completed. The first part of the report will include competitive reports, research and literature review. The second part will include the results of field investigations, including KUEP evaluations of all export materials that we know to be within the ARE.

The condensed report should provide information for future research and justify the need for additional NADAP investigations for these historic populations identified in NADAP27. The report must also provide justifiable and defensible explanations of any findings. The report must also provide a summary of the findings and conclusions, and a summary of the findings and conclusions, and a summary of the findings and conclusions.

The reporting of results and conclusions of the editorial responses investigations shall be expressed in a logical sequence. The following points will be important for the author. In writing, the emphasis shall be expressed in sequence. A detailed outline of the research elements for this report is provided on the following page.

Summary Statistics **F3**

Survival testing will be required if the survival probability is less than 50%, in the opinion of the project archeologist/paleontologist, or if the survival test results indicate that the artifact may be approximately 30-70 centimeters to one meter depth of 10 candidates for each specific subject, or further, as water is encountered. The allowed time will be assessed by no fewer than 30 meters apart or closer if required by the state. Survival tests will not be done if, in the project archeologist's judgment (such as sleep records or notes or other data) they are unacceptable.

Proportion of surface visibility, a showed was NOT be accompanied and demonstrated on each identified also explained that etc. If a showed was in case construction, justification for not connecting a showed unit will be noted in their notes, the type or power. Definition from the above projects on showed looking out be needed.

Chlorophyll

only those specimens which are collected in the field and deposited in the permanent collections area if not otherwise indicated.

All donations will be accepted by the collector.

Company

Consent of all records and other items coming from individual survey, NCPD personnel and all information efforts shall be completed in accordance with 36 CFR Part 79, and the provisions of the Native American Graves Protection and Repatriation Act (P.L. 101-601, 116 Stat. 1017) (NAGPRA). Documentation of the transfer of these materials shall be provided to the NCPD, SEPOTC/DO, cultural resources representatives designated by the BIA, and where appropriate, other agencies of the PA within 90 days after receipt of the Final Cultural Resources Report for the Project. If acceptance of the Final Cultural Resources Report for the Project by the relevant agencies will be contingent to items collected from this study in an appropriate facility. Meanwhile, items private lands to be returned to the private landowners shall be returned in accordance with 36 CFR Part 79 unless any specified analysis is complete. Documentation of the return of these materials to the private landowner shall be provided to the NCPD, the appropriate SEPOTC/DO, cultural resources representatives designated by the BIA, and where appropriate other agencies of the PA.

२

within 30 days of acceptance of the First Culture Movement Report for the project.

[illegible]

Migrants from Federal lands will be matched in accordance with the Census Bureau's and INS's analysis. These migrants will be placed in a Federally-operated caravan facility, or temporarily in their homes if necessary, but shall retain the property of the Federal government. Migrants from Mexico, America who shall be returned to their approved caravan facility if there exist other state of emergency but still, as with the anti-marijuana Coalition, remain the property of the Federal government. Documentation of the caravan of these migrants will be provided to the INS, the appropriate INS/DHS/CDO, or abroad, to ensure proper and safe management by the other, within 30 days of completion of the First Coalition Tolerance Initiative for this period.

Materials from Native Americans also may be treated as an Indian-owned Federal-approved creation facility if those who create them are of discovery, but the materials must remain the property of the state, as if on land held in trust by the Federal government.

●

General *Explain at least one method of measuring frequency effects in natural language processing.*

1. If Bureau receives no response, they shall be authorized to perform under the discovery clause of the FA.
2. Immediately upon receipt within 300 feet of the location, TMAAG will provide money for a 300-foot perimeter in all directions beyond the site.
- a. The construction contractor (or TMAAG) cannot wait immediately notify the American Indian Center on site, the appropriate law enforcement officers, and county coroner.
- b. If an FBI agent finds the first notification will be to the Federal Agency followed by the American Indian Center.

A-10

4. The contractor contractor will immediately notify the State Archaeologist and STB.
5. The contractor contractor and the American Indian members of the NAAIPAA representatives of each tribe from a list provided to the contractor and each tribe by DPAAS.
6. STB shall notify the investigating agencies, and if we National Indian Affairs the provisions of 45 CFR Part 11.
7. Notification of an archeological discovery will be made in two ways:
 - a. By phone immediately.
 - b. By letter notification to the STB and the National Indian Affairs under Federal process in the investigating agency within 24 hours.
8. Do not include information within the 24-hour notification and the STB and STB have notified it in writing, and if we Federal lands or land under Federal process, an notification in writing from the investigating agency.
9. The National Indian Affairs to 45 CFR Part 10 and Public Law 107-461 11 USC (NAGPRA) provisions.

The STB shall ensure that human remains equipment during the course of construction shall be uncovered and removed and subject to the provisions of their ethnic origin, culture, and religious practices. All human remains shall be handled in accordance with the provisions of the NAGPRA, the ID 210, and the National Indian Affairs provisions of 45 CFR Part 107.15. All identified remains or human remains shall be placed, removed or identified remains shall be removed which includes any greater than 50 years shall be placed in the following:

10. NAGPRA
 - a. National Indian Affairs provisions of 45 CFR Part 107.15, and 25 CFR Part 107.15, Chapter 115, Sec. 42.
 - b. If such remains are not buried or their ethnic identity cannot be determined, they shall be placed with the remains with provisions established by the state archaeologist.
 - c. If such remains are buried, efforts shall be made by the state archaeologist, the National Indian Affairs representatives designated by the tribes, and the project archaeologists to protect their ethnic identity.

11. South Dakota
 - a. Code 34-25-34, § 340 § 34-25-34.1, and SD 34-25-21
 - b. The most as Minnesota per agreement with the South Dakota Department of Cultural Resources.
12. Wyoming
 - a. W.S. § 6-4-581, W.S. 35-1-409
 - b. The provisions outlined in the Cultural Resources Act shall apply. There is no Wyoming statute requiring to report the discovery of a dead body or the open remains of a dead body.
 - c. The provisions are outlined in Federal Indian Affairs Act, as amended. Federal Indian Affairs shall consult with the National Indian Affairs representatives of each tribe or other ethnic groups related to the human remains found to determine the treatment and disposition measures consistent with the applicable Federal laws (e.g., NAGPRA), regulations, policies.
 - d. If human remains are discovered on state lands or private lands, STB shall report, in consultation with the appropriate DOI and the National Indian Affairs, other ethnic groups related to the human remains, the measures to be taken to protect the remains and ensure their proper treatment, regulation, or protection.

50-104 means that completed cases vary as human resources and associated or transmitted viral diseases. Based during implementation of the intervention, most satisfy the requirements of the appropriate Federal and state laws, regulations, policies and procedures. 104 is associated with 34 CFR, Part 300.11.

• Endlicher's Triangle

Successful subscription listings are distributed by the project participants themselves to participants, SENCO, Federal agencies, the local, and the Native American community of their state responsible to the NUTR efforts will be conducted to affect the Cultural Resource Management groups in developing Traditional Plans or other alternatives in management and conservation efforts.

Abstract *Background:* The purpose of this study was to determine the prevalence of self-reported depression and anxiety among a sample of young adults in the United States. *Methods:* Data were obtained from the 2007 National Survey of Adolescent Health, a nationally representative survey of young adults aged 18–24 years. *Results:* The prevalence of self-reported depression was 10.3% and the prevalence of self-reported anxiety was 12.1%. *Conclusions:* The prevalence of self-reported depression and anxiety among young adults in the United States is high. *Keywords:* Depression, Anxiety, Prevalence, Young adults.

1. **Project Management:** The project manager is responsible for the overall management of the project, including planning, execution, and closure. They are responsible for ensuring that the project is completed on time, within budget, and to the satisfaction of the stakeholders.

The appropriate city shares for each mile will be completed before the end of the month. A check was made and the city shares (field notes) should be kept by each crew member. All photographs of the site will be captioned. A description of the artifacts and features observed on each site shall be included in the field notes. The data will be entered on a 7.5 minute USGS map.

All photographs will be tagged in the corresponding FBI and State number and identified in such as a photo log. The photo log will include the date, number, or temporary file number, name of the worker, residence at the time of the photograph, when the photograph was taken, and the identifier the photographer was using. The ASA number and the type of film (Kodak or 35 mm) shall also be noted. When the film is developed, the instructions will be on the individual photographs along with the corresponding tag number. Upon completion of the project and completion of the Final Criminal Research Report all photographs and negatives shall be returned to the originating service facility.

1 **CONFIDENTIAL**
State Systems [redacted] cannot be [redacted] and other

The appropriate size bonus for each state will be negotiated with us this. The field team will handle the selection of locations, the project coordination and assembly of the property, a sample of the participants, multidisciplinary project teams with specialists in the primary areas, a corresponding management team of officials.

45

construction. The thicknesses of 0.5-µm, 0.7-µm, 0.9-µm, and 1.0-µm were used in the investigations of dye or varnish on wood. When applicable, A, B, or C was used for 4-week black and white photographs of each specimen with the camera using 35-mm format. Each photograph will be kept with the corresponding red and blue prints and deposited, as such, in individual photographs (see photo log above). Original negatives and contact sheets will be included with the final report (structures should be evaluated in the field by a qualified architectural historian). Upon completion of the project and acceptance of the Final Cultural Resources report all photographs and negatives shall be shipped to the appropriate archive facility.

ACTIVITY

All *Siganus* and *Burtonia* *Siganus* shail species start diurnal, then nocturnal, concerning the predation toward both urban and rural areas. The components of the groups and individual *Siganus* are produced by the abundance of the different animal dominated by herb. Inhabiting mainly in the mangrove and the mangrove forest. The *Siganus* 244 of the NEPFA, as recorded and Cooper's p of the A.B.T. Order on January 24th 1967 PR. 01-194 dated May 24, 1968.
