Re: Follow up CSX/Louisville and Indiana Conference Call 
David Navecky to: Logston, Jeffrey

01/26/2015 08:27 AM

Good morning, Jeff -

The number of trains in the CSX and L&I application is a projected number. The Board expects applicants to provide reasonable estimates of train numbers based on business plans and market projections. If this project is approved by the Board, the actual train numbers could be higher or lower. In the future, neither CSX nor L&I would need STB approval to either increase or decrease train volumes as they respond to the market, shipping demands and economic conditions.

I hope that answers your question.

Thanks,

Dave

Subject: Follow up CSX/Louisville and Indiana Conference Call

Good afternoon, Dave. I just wanted to follow up regarding the question raised about whether CSX's application for number of trains was a proposed number or if that would act as a cap without further approvals. If you could let me know that clarification, I would appreciate it.

Thanks again for your time with this process!
Jeff
