The purpose of this meeting is to continue discussions regarding issues such as rail performance, capacity constraints, infrastructure planning and development, and effective coordination among suppliers, carriers, and users of energy resources. Potential agenda items include updates from the RETAC subcommittees (Best Practices, Capacity Planning, Communication, and Performance Measures), a briefing by the Energy Information Administration on its Annual Energy Outlook 2010, and a briefing by Christensen Associates on its updated study of competition in the railroad industry.

The meeting, which is open to the public, will be conducted pursuant to RETAC's charter and Board procedures. Further communications about this meeting may be announced through the Board's website at WWW.STB.DOT.GOV.

This action will not significantly affect either the quality of the human environment or the conservation of energy resources.
