EI-23315

In reference to the GLB Railroad — here in Boone County we have some of the richest and most productive farm land in the world.

Investors, whether American or foreign, should not be allowed to despoil this land.

This railroad wants to travel over the top of existing buried gas lines — what if they should rupture — gas and other chemicals will be carried all the way into Chicago suburbs, because of our high water table!

God gave us this land, once it is ruined by people who care about no one, and nothing but themselves — we cannot receive more land — it's gone — it's ruined!

We need your help to protect this land — existing railroad lines are not interested in this new set of rails — if it is decided that new rails are needed, please put them next to existing lines.

Thank you,

Pat Richter
