Dear Mr. Novecky #35952,

I attended both the Wabasha and La Porte Indiana concerning "Great Lakes Basin RR" going around Chicago, I live it to be totally unnecessary as stated by owned citizens and landowners at these meetings. main complaint is the Biological impact and to the wildlife sanctuary I made, wetlands, and water to the Kankakee Basin (River) and Noise + Vibration!!

I purchased my 6.9 acres of abandoned RR track Wabash RR belted-up. It has taken me 30 years a nice woodland and good swamp for the now provide for.

the trains that used to run would pollute the have leaky tank cars, plus spray poison to kill ition along the tracks. I've managed to turn bad things around (no government help) to where there is quite, no RR crossing for accidents, no train Noise or train air pollutants.

two or 7 train RR tracks that run thru La Porte Mr. Frank Patton's complaint about a "bottle-neck" back Chicago all boils down to one thing. "POOR Management"!!! worst of all, Mr. Frank Patton's threat of "take your Eminent Domain stinks! World War II Ended a long time ago) on and Great Lakes Basin need to be stopped!

Sincerely,
Mary Jane Novak
