

April 7, 2006

To Phyllis Johnson - Ball
Finance Docket No 34747

We are opposed, to the #EI-2090
Concept of a Trash Transfer
Station, at the Olin Chemical
Site, in Wilmington, Ma.
This area has had its share
of environmental injustice. There
are already, two Superfund sites,
two landfills, and now the
possibility that Olin, will be
a third Superfund site, all
within close proximity of each
other.

We have enough traffic and
environmental problems, as it is and
we Don't need an ongoing Trash
Transfer Station, impacting our
neighborhoods.

Sincerely,

Concerned Parents and

Grandparents

Having lived in Stamford,
over fifty five years.
