Transcript:

I am calling to voice my opposition of the railway acquisition, against the CN acquisition of the EJE Railroad. I feel very strongly about this. I had just moved to the area a year ago partly for family reasons and I feel this is a safety issue with children and with so many children in the area--this is a very family oriented area. It also poses a large traffic problem and a hazard situation as well as the emergency vehicle response time. I am hoping that enough people can rally against this that it can be rejected and thank you for allowing me to leave my message.
