

Stop the Tongue River Railroad Coal Project

Dear Surface Transportation Board,

I oppose the construction of the Tongue River Railroad and urge you to reject this misguided project. The draft EIS released on April 17th does an inadequate job considering harmful impacts on Western Montana rail towns that will see additional coal train traffic if the TRR and West Coast export terminals are built. In addition, new carbon emissions that would result from building the TRR mean the project should be rejected on climate change grounds alone. I am especially concerned about the TRR's impacts on:

- ☒ Quality of life in rail line communities affected by noise pollution.
- ☒ Air quality in neighborhoods right next to the rail line (where highly localized impacts will be more severe than on any given town's air shed considered as a whole).
- ☒ Climate change caused by burning coal that would be transported on the TRR.
- ☒ Private property rights infringement and degradation of farmland in rural Montana.

Stop the Tongue River Railroad Coal Project

Dear Surface Transportation Board,

I oppose the construction of the Tongue River Railroad and urge you to reject this misguided project. The draft EIS released on April 17th does an inadequate job considering harmful impacts on Western Montana rail towns that will see additional coal train traffic if the TRR and West Coast export terminals are built. In addition, new carbon emissions that would result from building the TRR mean the project should be rejected on climate change grounds alone. I am especially concerned about the TRR's impacts on:

- ☒ Quality of life in rail line communities affected by noise pollution.
- ☒ Air quality in neighborhoods right next to the rail line (where highly localized impacts will be more severe than on any given town's air shed considered as a whole).
- ☒ Climate change caused by burning coal that would be transported on the TRR.
- ☒ Private property rights infringement and degradation of farmland in rural Montana.

Dear Surface Transportation Board,

I oppose the construction of the Tongue River Railroad and urge you to reject this misguided project. The draft EIS released on April 17th does an inadequate job considering harmful impacts on Western Montana rail towns that will see additional coal train traffic if the TRR and West Coast export terminals are built. In addition, new carbon emissions that would result from building the TRR mean the project should be rejected on climate change grounds alone. I am especially concerned about the TRR's impacts on:

- ☒ Quality of life in rail line communities affected by noise pollution.
- ☒ Air quality in neighborhoods right next to the rail line (where highly localized impacts will be more severe than on any given town's air shed considered as a whole).
- ☒ Climate change caused by burning coal that would be transported on the TRR.
- ☒ Private property rights infringement and degradation of farmland in rural Montana.

Stop the Tongue River Railroad Coal Project

Dear Surface Transportation Board,

I oppose the construction of the Tongue River Railroad and urge you to reject this misguided project. The draft EIS released on April 17th does an inadequate job considering harmful impacts on Western Montana rail towns that will see additional coal train traffic if the TRR and West Coast export terminals are built. In addition, new carbon emissions that would result from building the TRR mean the project should be rejected on climate change grounds alone. I am especially concerned about the TRR's impacts on:

- ☒ Quality of life in rail line communities affected by noise pollution.
- ☒ Air quality in neighborhoods right next to the rail line (where highly localized impacts will be more severe than on any given town's air shed considered as a whole).
- ☒ Climate change caused by burning coal that would be transported on the TRR.
- ☒ Private property rights infringement and degradation of farmland in rural Montana.

Additional comments:

Now is the time for action
on renewable energy; we can not
afford to wait.

The draft EIS released on April 17th does an inadequate job considering harmful impacts on Western Montana rail towns that will see additional coal train traffic if the TRR and West Coast export terminals are built. In addition, new carbon emissions that would result from building the TRR mean the project should be rejected on climate change grounds alone. I am especially concerned about the TRR's impacts on:

- ☒ Quality of life in rail line communities affected by noise pollution.
- ☒ Air quality in neighborhoods right next to the rail line (where highly localized impacts will be more severe than on any given town's air shed considered as a whole).
- ☒ Climate change caused by burning coal that would be transported on the TRR.
- ☐ Private property rights infringement and degradation of farmland in rural Montana.

In addition, new carbon emissions that would result from building the TRR mean the project should be rejected on climate change grounds alone. I am especially concerned about the TRR's impacts on:

- ☒ Quality of life in rail line communities affected by noise pollution.
- ☒ Air quality in neighborhoods right next to the rail line (where highly localized impacts will be more severe than on any given town's air shed considered as a whole).
- ☒ Climate change caused by burning coal that would be transported on the TRR.
- ☒ Private property rights infringement and degradation of farmland in rural Montana.

Stop the Tongue River Railroad Coal Project

Dear Surface Transportation Board,

I oppose the construction of the Tongue River Railroad and urge you to reject this misguided project. The draft EIS released on April 17th does an inadequate job considering harmful impacts on Western Montana rail towns that will see additional coal train traffic if the TRR and West Coast export terminals are built. In addition, new carbon emissions that would result from building the TRR mean the project should be rejected on climate change grounds alone. I am especially concerned about the TRR's impacts on:

- ☒ Quality of life in rail line communities affected by noise pollution.
- ☒ Air quality in neighborhoods right next to the rail line (where highly localized impacts will be more severe than on any given town's air shed considered as a whole).
- ☒ Climate change caused by burning coal that would be transported on the TRR.
- ☒ Private property rights infringement and degradation of farmland in rural Montana.

Stop the Tongue River Railroad Coal Project

Dear Surface Transportation Board,

I oppose the construction of the Tongue River Railroad and urge you to reject this misguided project. The draft EIS released on April 17th does an inadequate job considering harmful impacts on Western Montana rail towns that will see additional coal train traffic if the TRR and West Coast export terminals are built. In addition, new carbon emissions that would result from building the TRR mean the project should be rejected on climate change grounds alone. I am especially concerned about the TRR's impacts on:

- ☒ Quality of life in rail line communities affected by noise pollution.
- ☒ Air quality in neighborhoods right next to the rail line (where highly localized impacts will be more severe than on any given town's air shed considered as a whole).
- ☒ Climate change caused by burning coal that would be transported on the TRR.
- ☒ Private property rights infringement and degradation of farmland in rural Montana.

Additional comments: The burning of coal is responsible, + linked
to, 4 of 5 major causes of death in USA: Heart Disease,
Lung Disease, Cancer, Stroke. Regardless of where

Stop the Tongue River Railroad Coal Project

Dear Surface Transportation Board,

I oppose the construction of the Tongue River Railroad and urge you to reject this misguided project. The draft EIS released on April 17th does an inadequate job considering harmful impacts on Western Montana rail towns that will see additional coal train traffic if the TRR and West Coast export terminals are built. In addition, new carbon emissions that would result from building the TRR mean the project should be rejected on climate change grounds alone. I am especially concerned about the TRR's impacts on:

- ☒ Quality of life in rail line communities affected by noise pollution.
- ☒ Air quality in neighborhoods right next to the rail line (where highly localized impacts will be more severe than on any given town's air shed considered as a whole).
- ☒ Climate change caused by burning coal that would be transported on the TRR.
- ☐ Private property rights infringement and degradation of farmland in rural Montana.

Stop the Tongue River Railroad Coal Project

Dear Surface Transportation Board,

I oppose the construction of the Tongue River Railroad and urge you to reject this misguided project. The draft EIS released on April 17th does an inadequate job considering harmful impacts on Western Montana rail towns that will see additional coal train traffic if the TRR and West Coast export terminals are built. In addition, new carbon emissions that would result from building the TRR mean the project should be rejected on climate change grounds alone. I am especially concerned about the TRR's impacts on:

- ☒ Quality of life in rail line communities affected by noise pollution.
- ☒ Air quality in neighborhoods right next to the rail line (where highly localized impacts will be more severe than on any given town's air shed considered as a whole).
- ☒ Climate change caused by burning coal that would be transported on the TRR.
- ☐ Private property rights infringement and degradation of farmland in rural Montana.

In addition, new carbon emissions that would result from building the TRR mean the project should be rejected on climate change grounds alone. I am especially concerned about the TRR's impacts on:

☒ Quality of life in rail line communities affected by noise pollution.

☒ Air quality in neighborhoods right next to the rail line (where highly localized impacts will be more severe than on any given town's air shed considered as a whole).

☒ Climate change caused by burning coal that would be transported on the TRR.

☒ Private property rights infringement and degradation of farmland in rural Montana.

Stop the Tongue River Railroad Coal Project

Dear Surface Transportation Board,

I oppose the construction of the Tongue River Railroad and urge you to reject this misguided project. The draft EIS released on April 17th does an inadequate job considering harmful impacts on Western Montana rail towns that will see additional coal train traffic if the TRR and West Coast export terminals are built. In addition, new carbon emissions that would result from building the TRR mean the project should be rejected on climate change grounds alone. I am especially concerned about the TRR's impacts on:

- ☐ Quality of life in rail line communities affected by noise pollution.
- ☒ Air quality in neighborhoods right next to the rail line (where highly localized impacts will be more severe than on any given town's air shed considered as a whole).
- ☒ Climate change caused by burning coal that would be transported on the TRR.
- ☒ Private property rights infringement and degradation of farmland in rural Montana.

Stop the Tongue River Railroad Coal Project

Dear Surface Transportation Board,

I oppose the construction of the Tongue River Railroad and urge you to reject this misguided project. The draft EIS released on April 17th does an inadequate job considering harmful impacts on Western Montana rail towns that will see additional coal train traffic if the TRR and West Coast export terminals are built. In addition, new carbon emissions that would result from building the TRR mean the project should be rejected on climate change grounds alone. I am especially concerned about the TRR's impacts on:

- ☒ Quality of life in rail line communities affected by noise pollution.
- ☒ Air quality in neighborhoods right next to the rail line (where highly localized impacts will be more severe than on any given town's air shed considered as a whole).
- ☒ Climate change caused by burning coal that would be transported on the TRR.
- ☒ Private property rights infringement and degradation of farmland in rural Montana.

Stop the Tongue River Railroad Coal Project

Dear Surface Transportation Board,

I oppose the construction of the Tongue River Railroad and urge you to reject this misguided project. The draft EIS released on April 17th does an inadequate job considering harmful impacts on Western Montana rail towns that will see additional coal train traffic if the TRR and West Coast export terminals are built. In addition, new carbon emissions that would result from building the TRR mean the project should be rejected on climate change grounds alone. I am especially concerned about the TRR's impacts on:

- ☒ Quality of life in rail line communities affected by noise pollution.
- ☒ Air quality in neighborhoods right next to the rail line (where highly localized impacts will be more severe than on any given town's air shed considered as a whole).
- ☒ Climate change caused by burning coal that would be transported on the TRR. ★
- ☒ Private property rights infringement and degradation of farmland in rural Montana.

Additional comments:

Please do not continue on the
fossil fuel path.

No Action Alternative

ADDRESS DOWN-LINE IMPACTS TO NORTH IDAHO

Dear Surface Transportation Board,

I strongly urge you to choose the "No Action" Alternative described in the draft EIS. Despite STB's assertion that it would examine down-line impacts to affected communities from the TRR, the DEIS does not consider any impacts to North Idaho's rail-side cities. Additional rail traffic that will be generated from the TRR will impact our overall quality of life and I am particularly concerned about the TRR's impact on:

- ☒ Human health and safety (delayed emergency response, increased risk of accidents, noise pollution)
- ☒ Traffic delays
- ☒ Economic impacts (loss of property value)
- ☒ Water and air quality impacts from coal and coal dust release and diesel particulates

Additional comments: TAKE NO ACTION
