Regarding purchase of EJ&E railway by Canadian National railway there are several variables that make this a bad idea. The New Lenox is already becoming more congested due to I355 extension as well as upcoming major mall to the area and the relocation of Silver Cross Hospital. I feel the increase in volume of traffic is not only an environmental issue but a real safety concern as well. I don't feel it would be in the best interest of the surrounding communities to add more pollution and congestion to this area.
