The change in rail use patterns for Chicago's remote suburbs, such as New Lenox, will be devastating to our area if this sale goes thru. The cost of security and emergency service relocation, upgrading of grade level crossings, and noise amelioration will be hundreds of millions of dollars across Chicago's suburbs. If this plan is approved without Canadian National paying the FULL costs to the community, those costs will have to be covered by local, state, and federal tax dollars, and it will be like the US taxpayer sending money directly to the bottom line of a foreign entity. In this time of economic crisis(or any other time, for that matter) that would be criminally irresponsible use of our tax dollars. We will all make every effort to assure that no taxpaying American is unaware of this misuse of our money and WHO allowed to occur.
